

ARTICLE 1

Definitions

1. For the purpose of this Agreement:
 - (a) “appropriate governmental authority” means for Canada, the Canadian Nuclear Safety Commission, and for the United Arab Emirates, the Ministry of Foreign Affairs of the United Arab Emirates;
 - (b) “equipment” means any of the equipment listed in the Annex;
 - (c) “deuterium and heavy water” means deuterium and any deuterium compound in which the ratio of deuterium to hydrogen exceeds 1:5000 for use in a nuclear reactor, as defined in paragraph 1 of the Annex , in quantities exceeding 200 kg of deuterium atoms in any period of 12 months;
 - (d) “material” means deuterium and heavy water and nuclear grade graphite;
 - (e) “nuclear grade graphite” means graphite having a purity level better than 5 parts per million boron equivalent and with a density greater than 1.50 grams per cubic centimetre in quantities exceeding 30 metric tons in any period of 12 months;
 - (f) “nuclear material” means any source material or any special fissionable material as these terms are defined in Article XX of the Statute of the IAEA, which are set out in subparagraphs (i) and (h) below. Any determination by the Board of Governors of the IAEA under Article XX of the Statute of the IAEA that amends the list of material considered to be “source material” or “special fissionable material” shall have effect under this Agreement only when the Parties to this Agreement have informed each other in writing that they accept that determination;
 - (g) “persons” means individuals, firms, corporations, companies, partnerships, associations, and other entities, private or governmental, whether or not they have a legal personality, and their respective agents;
