new low for the year.

Beaver at New Low.

The Cobalts were dull thruout and followed the lead of the gold stocks. Beaver made a new low record for the year tasty, and Bailey and Great Northern were both lower. City of Cobalt at 48 was up a full point, but the close was under that quotation. Peterson Lake at 23. Timiskaming at 34% to 35, and Crown Reserve at \$3 95 were comparatively unchanged.

Crown Reserve at \$3.95 were comparatively unchanged.

The market was in a rather cheerful mood at the close, with public interest slightly more pronounced. The list would undoubtedly respond quickly to the incoming of any material demand, for the floating supply of stock has been reduced to small volume. Meanwhile a comparatively large short interest has been built up and on any attempt to cover, prices would probably rally immediately.

A despatch received in Toronto yesterday stated that work at the Pearl Lake is partially suspended owing to the lack of power from the plant. The mine is already partially equipped for resuming operations with steam power. A new steam-driven compressor has been shipped, and should be in place within two weeks, thus rendering the company entirely independent of the electric power situation. As soon as this compressor is installed, full operations will be resumed.
