CAUSED DEATH

Mysterious and Sudden End of Aberdeen Ave. Man is Under Probe.

At 5.30 yesterday afternoon, John Mason, age 65, of 33 Aberdeen avenue was found unconscious in his room by his wife, and was removed to the General Hospital, where he died two hours later. were very reticent last evening to make definite statements until after an inquest has been held.

Mason, who was an employe of the Davies Packing Company, had been ill off and on for over a year, and had been taking various medicines prescribed for him by his physician. When Mrs. Mason found him unconscious on the floor of his bedroom she believed him to be in an epileptic fit, but, falling to arouse him, summoned assistance. At the hospital the man grew worse, instead of better, and the pulmotor was used in an attempt to save his life. In spite of all efforts, however, he expired at 7.30. Morphine and cocaine are two of the drugs suggested which might have proved fatal to Mason, but the cause of his death becomes a mystery when his wife emphatically states he was not addicted to any drug what-soever.

Soever.

The body was removed to the morgue, where an inquest will be opened today. An autopsy will be performed on the body to see if there is any poison in the man's stomach.

stomach.

Dr. Riley, speaking to The World last night, said that Mason was subjected to acute attacks of heart failure. He believed that Mason may have been seized with one of these attacks during the afternoon, which might have caused an enlargement of an artery in the brain, which would act similarly to that of morphine poisoning.
