STUDENTS AT VARSITY READY TO START WOR

Academic Year Will Be Opened To-day-Enrolment Will Surpass Last Year's.

At 8 o'clock this afternoon President alconer will deliver his annual adas to the students of all faculties, in convocation Hall. This event marks the official opening of the academic year, and on Thursday morning the lectures in the various colleges commence. During the past day or two the enrolment has been very heavy, and Registrar Brebner has had a busy time. To-day and to-morrow the enrolment of students will continue. With the exception of the medical college it is expected that the number of students in attendance at the university this session will be considerably in excess of any previous year. This is rather remarkable, owing to the fact that the matriculation standard has been raised so materially. Mr. Brebner states, however, that students preparing to enter the university have had sufficient notice of the new regulations and they appear to have prepared themselves for the stiffer examinations.

Fawer "Mads" Enrolled. he official opening of the academic

minations.

Fewer "Meds" Enrolled.

In medicine there will be a slump of about 125 from the total enrolment of 1910-1911. This is owing to the exceptionally big class who graduated last year, marking the wind-up of the four-year course. Five sessions of eight months each are now required by the university before a degree in medicine is granted, and the lengthened course has caused a noticeable drop in the number of would-be medicos.

The students have been arriving faily for the past week and the university campus and lawns are taking on their natural appearance of animation. The supplemental examinations brought scores of students to the city two weeks ago, but hundreds have arrived since then.

Work has commenced on the new block of buildings which are being erected by the Massey estate, just east of the University College campus. This block will include a Y.M.C.A. building, a gymnasium, an assembly hall and a club-house. Nature's Cure for Nervous Ailments.

So many people are suffering from mervousness or aliments caused by nervousness, and try to cure these troubles by doping their stomachs with drugs. It is as impossible as it is to put out a fire with oil. When you take a drug to cure a nervous aliment you only aggravate the trouble, and you only aggravate the trouble, and you only aggravate the trouble, and soothe the nerves for a few hours by superying them, but the trouble returns worse than ever just as soon as the stupor wears off.

Nature will cure you if you will give her the right kind of assistance. The reason your nerves are weak is because they are not properly fed. I don't mean that you do not eat enough Nerve food is a force that comes from electricity. When your supply of bodily electricity has become depleted the nerves do not get the proper nourishment, and various compilications result.

The only way to cure nervous fit you will enclose this prepaid, free, if you will enclose this prepaid, free, if you will enclose this coupon.
