

STOCKS SAG DOWN
FOR WHOLE LIST

Coalers Retard Downward
Owing to Reduction of
Coal Price.

New York, Aug. 22.—The action of the government in enforcing reduced prices for soft coal, with the belief that similar provisions are to be instituted in regard to anthracite, created widespread uneasiness on the stock exchange today.

Shares of roads which depend on the coal trade for their revenue were the greater part of the decline. The Erie, Erie & Western, and Delaware & Hudson, all declined sharply at extreme close. The Erie & Western declined 10 points.

Other conditions, in their bearing upon the coal trade, and reports of a new coal strike, also contributed to the decline. The Erie & Western, and Delaware & Hudson, all declined sharply at extreme close. The Erie & Western declined 10 points.

The money market was shown until the last hour, when a rally of five points was caused by a short covering in other quarters. The recovery was of brief duration, however, and the market closed with a decline of one point.

DOMINION STEEL
ONE STRONG ISSUE

Toronto Market Inactive and
Heavy With Practically
Only One Exception.

In an otherwise weak and inactive market Dominion Steel stands out as a strong feature. Nothing otherwise than general reasons are assigned for this strength, which is all the more conspicuous owing to the weakness in steel issues on Wall street. The Dominion Steel Company is undoubtedly on a much better basis than at any time in its history, and has placed itself in a financial position totally different to that of former periods.

The company is self-contained, and when war activities have ceased and there is a possibility of keener competition for business, Dominion Steel can readily face this because it is self-contained. Nova Scotia Steel is similarly situated and has thereby gained the confidence of American financiers. Dominion Iron struck 60 yesterday, and was barely influenced by the general feeling of depression. There was little market for the general list, and any outside buying was more for investment than speculation.

Local mining brokers have expressed themselves as elated at the orderly upward swing in the mining market, and the belief is held that a long period of higher prices for the mining stocks is in store. The volume of trading has been greatly increased from day to day, until yesterday almost 200,000 shares were traded in as against the average day recently of about 100,000 shares. Prices are also showing the effects of the demand for stocks, and the gains made, though not sensational, are, on that account, regarded as more permanent than if they had been the result of a speculative boom.

The advances have so far been the natural result of a better demand for stocks, and the leadership of the market is also regarded as excellent. Some profit taking appeared yesterday, which in some of the lesser advanced stocks was being sold, but this is a healthy sign and speaks well for the continuance of the bull movement. In other issues the market was again inactive, and was responsible for still higher prices. This was particularly true of the higher priced silver stocks, which were being bought by New York and the big gold shares where inside buying continued.

Altho the official price of silver came out from New York unchanged at 85 cents, it was reported locally that Nipissing had disposed of the white metal at 91 cents per ounce. While news of this sort keeps coming out, there is little doubt that the silver stocks are being bought.

Kerr Lake was one of the outstanding features of the market. New York took most of the stock that was offered at the advance in price to \$6.10. Nipissing went up also to a new high for the present movement at \$6.80. Coniag changed hands at \$4.10 to \$4.15, and Adams was the most active trader in the silver group, over twenty-five thousand shares being traded in. Buying was reported from the United States and from the north, and on the strength of it the stock made a recovery to 19 1/2. Chambers-Ferland lost a point from the opening at 16 1/2 on profit taking, and Beaver, after starting strong at 35, came back a similar amount. Hargrave made a new high to the movement at 14. McKinley went up again to its high at 60. Pericard was active and stronger at 12 to 12 1/2, and Flunkman met a better demand around 22 1/2 to 23.

Good inside buying developed in the minority with the attendant advance in price to 16 1/2, with the close only a point below the high for the day. Yesterday's closing price on the stock represents a total gain in the last week of about 100 points. There seems to be little doubt regarding the declaration of the dividend.

Big Dome had a re-awakening both here and in New York. Locally it sold up to \$10.60, with the close only a point below the high for the day. Yesterday's closing price on the stock represents a total gain in the last week of about 100 points. There seems to be little doubt regarding the declaration of the dividend.

Big Dome had a re-awakening both here and in New York. Locally it sold up to \$10.60, with the close only a point below the high for the day. WHEAT FINISHES
FOUR CENTS DOWN

Corn Also Falls Away Under
Selling Pressure at
Chicago.

Chicago, Aug. 22.—Corn, which fell away under selling pressure in the early trading today, had a good recovery when offerings had been absorbed, and finished well towards top figures for the day. The close was steady 1/4c to 1/2c net lower, with December at \$1.04 1/2 to \$1.05, and May at \$1.04 1/2 to \$1.05. Wheat finished at \$2.04 for September, the sole option, a decline of 1/4c. Oats advanced 1/4c to 3/4c, while provisions finished 1/2c to 1/4c below yesterday's closing prices.

Generally good weather reports, with the expectation that most crops would mature before the usual time for killing frosts, apparently influenced the early selling. When offered lines had been disposed of, prices rallied, many traders who had sold replenishing their stocks as the figures advanced. Shorts covering also contributed to the rally. With the improved prices there was a good cash demand.

Wheat trading was all in the nature of evening-up transactions, some of which were hastened by announcement that the board of trade officials were expected to take action fixing figures on September contracts, which would be closed before the government's action over the handling of wheat Sept. 1. Late trading was at lower figures than the early sale.

Oats early in the session moved down in sympathy with corn, but advanced quickly in narrow limits on the demand for commission houses. Covering deals figured in the strength of the market. Prices hovered close to the government's action over the handling of wheat Sept. 1. Late trading was at lower figures than the early sale.

Oats early in the session moved down in sympathy with corn, but advanced quickly in narrow limits on the demand for commission houses. Covering deals figured in the strength of the market. Prices hovered close to the government's action over the handling of wheat Sept. 1. Late trading was at lower figures than the early sale.
