THE COLUMBUS RACES.

COLUMBUS, Sept. 26.—All three of the class races, which, with the finish of the 2.09 trot that was started on Thursday, comprised the programme for the fith day of Columbus Grand Circuit racing, were spilt up so that fourteen heats were raced during the atternoon. The field were large, each race having from 11 to 13 starters.

Grand Marshall took the one heat needed to settle the 2.09 trot. Bismya, by Bingar, was favorite in the 2.19 trot, and won in 2.094, after the first heat had been taken by Marta Bellini in 2 113. In the 2.11 pace, Sellars D, won the first heat in 2.062; Ool. Frankiyn the second and third in 2.004; Ool, and Hydrich the fourth in 2.074. The judges hesitated about dealering the race completed, after the fifth heat, done in 2.132, which was a sprint through the last quarter in 254 seconds, and had been won by Colonel Frankiyn. After a delay, the race was held to be ended. Great Soott won the 2.18 pace in 2.074.

When Peroud was 6,000 feet up there was a rep from, the spectators, "he is coming down," and almost immediately he dived straight toward the carth. Then he overturned the machine on its back and for nearly a minute flew apside down. It seemed incredible that there may must be deceiving them. When at the end of a minute he turned his machine right again it was clear he had outdone his feat of resterday.

We have a new one, fash TUTTLE'S,

when at the end of a minute he turned his machine right again it was clear he had outdone his feat of yesterday.

One would have thought this was thrill enough, but in the same descent Pegond turned his machine an its back again. By this time he had dropped to about 1000 feet, and it was thought he was coming to the earth, but to the astonishment of the crowd he commenced his ascent. Again he climbed to about 6000 feet and then turned the nose of his machine sharp to the earth he was commended his ascent. Again he climbed to about 6000 feet and then turned the nose of his machine sharp to the earth. What followed was even more sensational for Pegond actually looped the loop twice, one movement following the other immediately, and before he came to the earth he turned his machine on its back again. When he landed there was a wild burst of cheering and the crowd broke through the barriers and rushed to meet him.

The young British aviator, Gustave Hamel, said that he hoped to emulate Pegoud's exploit. If have just ordered a Bleriot monoplane of the wind from what I knew of angle flying. I am convinced that the whole problem rests with the human being. M. Blertot tells me that my own flying with the short wings I used in the Aertail Derby is far more dangerous than any of Pegoud's feats. He is convinced that with my experience I have been flying much longer than Pegoud. I shall be able to fly a pusing dedwarder a few seconds. When I know what the feeting is like I shall only ary flying myside whether or not'l have the nerve for more.

Will Our Suburban Customers

be good enough to send us in their Coal Orders NOW? We can handle them satisfactorily and deliver them promptly at the present time. The roads are in good shape and the "going" will not be better. Next month and the succeeding Fall and Winter ones, the days will be shorter, the roads will be in poorer condition and the usual Autumn and Winter "rush" will be on. Deliveries then cannot be made as promptly as now. There may be times when road and other conditions will prevent our sending orders out to our customers. The wise thing to
