

I MAKE THE WEAK Strong and Powerful

Let any person who is weak, broken down, old and decrepid in physical weakness, full of pains and aches, gloomy, despondent and cheerless—any person who wants to be stronger and younger than they feel—let them come and tell me how they feel, and if I say that I can cure them they can depend upon it. This to those who are afflicted with Nervous Debility, who get up tired in the morning, have backache, rheumatism, stomach, liver, bladder and kidney trouble, who are constipated or suffering from nerve or muscle affliction or some forms of paralysis and locomotor ataxia. I don't want money that I don't earn, I don't need it and am not after it. But I am after the dollars that are now going wrong in the quest of health. Look at all these poor wrecks of humanity that are spending all they earn on drugs—drugs that is paralyzing their system—that have spent all they have earned for years without gaining a pound of strength for the hundreds of dollars wasted.

That is the money that I am after, because for every dollar I take I can give a thousand per cent interest to those who invest it. I have cured so many cases right here that I can prove my claims to you, but if that proof is not enough I'll give you the names of people right near you—where you are. Is that fair?

Most of the Belts that I am selling now are to people who have been sent to me by friends whom I have cured. I think that is the best evidence that my business is a success from the standpoint of cures, as well as on the dollar side. I have restored strength and health to thousands of weak people with my

DR. McLAUGHLIN'S ELECTRIC BELT

with its special attachments for all parts of the body. My appliance brings the grand curative power of electricity within the reach of all suffering people. Electrical treatment at a physician's office, sanitarium or hospital is beyond the reach of most people, both as regards time and money. My prices are reasonable, and my appliance is used without loss of time.

"I suffered from kidney and bladder trouble, contracted in South Africa, and was discharged from the hospital as incurable. Six weeks' use of your Belt and I was able to go around, and am now able to work. I attribute my cure to the use of your Belt."—WM. F. BROADSTOCK, Clarkson, Ont.

"I have found a complete cure of sciatica, rheumatism and back trouble from the use of your Belt, after three and a half years' suffering and doctoring. I am also restored completely from that tired feeling."—JOSEPH C. ARMSTRONG, 173 Rectory Street, London, Ont.

"After a short trial of your Belt, I firmly believe that any one wearing one as you direct, cannot fail to receive the most gratifying results."—ALEX. GRAHAM, Gosport, P. E. I.

I know how sceptical people are, after paying out hundreds of dollars without getting any benefit, and know that many would pay after they were cured. To those I say, set aside those prejudices, give me evidence of your honesty by offering me reasonable security for the Belt. I will arrange it with necessary attachments suitable for your case, express it to you, and you can

MR. WM. G. BIRDSELL, Clinton, Buckeye Creek, B. C., says: "Your Belt cured me of lame back in two weeks' use, and I cannot say too much for it. It was far beyond my expectations."

"I am very much pleased with your Belt, and think it is a grand remedy. I feel well in every way, and shall always recommend it."—CHRIS. WILLIAMS, Cranbrook, B. C.

"Your Belt cured me of rheumatism and sciatica almost two years ago, and I have never felt any of it since. I can recommend your Belt to any one suffering with rheumatism in any form."—MRS. J. L. HYNDMAN, 501 Young Street, Winnipeg, Man.

"Your Belt cured my weak back, and I will recommend it to all suffering as I did."—FRED. COX, 450 Logan Avenue, Winnipeg, Man.

Wear it Until Cured and Pay Me When the Work is Done.

FREE BOOK

Write me to-day for my beautifully illustrated book, with cuts showing how my Belt is applied, and lots of good reading for men who want to be "the noblest work of God," A MAN. Enclose this coupon and I will send this book, sealed, free.

DR. M. D. McLAUGHLIN, 130 Yonge St., Toronto, Can.:

Dear Sir, Please forward me one of your books as advertised.

AGRICULTURE.

VALUE OF AGRICULTURAL EDUCATION.

Largely owing to the efforts and initiative of Sir Horace Plunkett, agriculture in Ireland is being raised to something of the status that it enjoys in such countries as Denmark. Sir Horace believes in the system of travelling lecturers and demonstrations. At a meeting of the County of Armagh Committee of Agriculture recently, he said he did not think that any objection would be taken to the proposal for the allocation of £350 for itinerant instruction because the Department paid no less than £283 6s. 8d. of that sum, so that even if it were true, as the chairman had said, that the value of agricultural instruction was doubtful and hypothetical, it would at any rate cost the ratepayers of the county very little to continue it. The experience of the Department throughout Ireland was that every county that was making any progress was each year taking more and more enthusiastic interest in the scheme of agricultural instruction, and they were suggesting to that committee—and it was at the option of the committee to adopt that suggestion or not—the desirability of entering upon a second stage of agricultural instruction in County Armagh. It was explained five years ago that the proposal of the Department was for the employment of an itinerant instructor—an extremely competent official in the case of that county—to go through each county giving assistance in various ways; and, above all, that he should interest the farmers in agricultural education in order that they might be induced to give the rising generation opportunities which they themselves had not enjoyed; and it was in pursuance of that policy that they now suggested to that committee that they should add to their programme a scheme for agricultural classes, the cost of which, as they had heard, would be £180 for the year, of which sum the Department would contribute £100. He hoped that the chairman would change his opinion that agricultural education was of doubtful value to farmers; and he (Sir Horace) would ask the chairman to tell him of a single country in Europe in which agriculture was in an advanced stage where they did not attach, not only importance, but paramount importance to agricultural instruction, and where they did not put education far above flax schemes and show subsidies and every other kind of scheme. It was only because Ireland was a backward country that they had to begin at the other end and give premiums to bulls and nominations to mares and other substantial inducements in order that they might see immediate advantages; they had not reached the stage where they saw the great benefits of science and education—far greater than the innovations of private enterprise or the allocation of money in other schemes and modes. Therefore, he did implore that committee, as being an advanced community in other matters, to say that they at any rate will give a lead to other parts of Ireland in trying at that very important period in their history to follow in the wake of other countries in Europe, which, since the universal competition from foreign lands set in, had managed to raise themselves from a state of comparative backwardness to a state of comparative prosperity. He did not wish to take up unduly the time of the meeting, which he saw would be fully occupied in discussing other schemes, but he would ask them before they voted away all their money to schemes which, no doubt, were more easily understood and more easily appropriated, that they would take what he might call the long view, and profit by the experience of other countries which had succeeded where they had failed. He would suggest to them the wisdom of following this advice—not his own advice merely, but the advice of all the experts in the Department and add to their scheme of itinerant instruction, as other Irish counties had done alone, a scheme for the establishment of agricultural classes. The suggestions of Sir Horace Plunkett were agreed to.
