

WARNER & CO.'S

SOLUBLE SUGAR-COATED

PHOSPHORUS PILLS.

Observe the following Trade Mark on each label as a guarantee of genuineness.

The method of preparing Phosphorus in pilular form has been discovered and brought to perfection by us, without the necessity of combining it with resin, which forms an insoluble compound. The element is in a perfect state of subdivision and incorporated with the excipient while in solution. The non-porous coating of sugar protects it thoroughly from oxidation, so that the pill is not impaired by age. It is the most pleasant and acceptable form for the administration of Phosphorus.

Specify WARNER & CO. when prescribing, and order in bottles of one hundred each when practicable, to avoid the substitution of cheaper and inferior brands.

Messrs. WM. R. WARNER & CO.

NEW YORK, November 11, 1877.

GENTLEMEN.—The Phosphorus Pills submitted to me for chemical analysis and microscopic examination, afford only traces of Phosphoric Acid, and contain the one-twenty-fifth of a grain (gr. 1-25) of the element in each Pill, as expressed upon the label: they do not exhibit particles of undivided Phosphorus, the mass being perfectly homogeneous in composition, soft in consistency and thoroughly protected by the non-porous coating of sugar from the oxidizing influence of the air. Each pill is an example of what skill, care and elegant Pharmacy can do.—I regard them as a marvel of perfection.

Very respectfully,

A. E. McLEAN,

CENTENNIAL WORLD'S FAIR AWARD.

"The Sugar-Coated Pills of Wm. R. Warner & Co. are Soluble, Reliable, and Unsurpassed in the perfection of Sugar-Coating, thorough composition and accurate subdivision."

"The pills of Phosphorus are worth of special notice. The element is thoroughly diffused and subdivided, yet perfectly protected from oxidation."

Attest,
