

KIDNEY COMPLAINTS.

SYMPTOMS.

Pain in Loins,
Back Ache,
High Colored Urine,
sometimes Color-
less or Thick and
Slimy, with Sedi-
ment,
Weakness,
Fever,
Dropsy, etc.

When the Kidneys take on irritation, or become diseased by bile, poisoned blood or an excess of *uric acid*, some of these recorded signs are generally present. The symptoms, of course, vary according to the nature of the complaint and its different stages of progress. A faulty condition of

the kidneys is sure to lead to serious consequences if neglected. When the excess of *uric acid* is not carried off by their action, rheumatism, gravel, and other obstinate troubles arise. It is the particular work of the kidneys to remove the poisonous matter from the blood, which, if retained, would create these diseases. The common diseases ascribed to the kidneys are Diabetes or Sugary Urine, Bright's Disease, Incontinence of Urine, Dropsy and Rheumatism. In ninety-nine cases out of one hundred, however, ill-working biliary organs and bad blood is the primary source of the trouble by which the kidneys are clogged in their action. Hence the folly of doctoring the kidneys without correcting the bile and blood, and herein lies the fact of the success of Burdock Blood Bitters in curing Kidney Complaints. It promptly removes the cause of all the trouble. All the kidney remedies in the world that do not make purer and better blood, and more perfect circulation, are worse than useless.

CAUSE.—Taking cold, straining the muscles of the loins, a bad state of the blood, inactivity of the skin, kidneys and organs of secretion generally, as well as the absorbents that favor the accumulation and retention of the watery or bad portions of the blood in the system, improper food and drink, too free use of spirituous and malt liquors, etc.

CURE.—Correct the bile and blood, promote perfect circulation of the fluids, open all the avenues of health to carry off all waste matter that obstructs the system, and give free vent to the outlets of disease, while the system is being nourished and sustained. This work is just what Burdock Blood Bitters best does. It possesses the most perfect diuretic properties known for acting upon the urinary secretion, and has cured some of the worst cases of Kidney Complaint on record, as well as dropsy, when other medical aid had failed.

Most of the dangers of complicated Kidney troubles may be averted, if taken in time, by promptly resorting to the grand purifying, regulating powers of Burdock Blood Bitters.

TESTIMONIALS.

TUMOR OF THE SPLEEN AND DROPSY—A MANY MONTHS CURE.

I hereby submit the following to the public, that any who may be afflicted as I was may be benefited by the same remedy that I used so successfully. In June, 1884, I was examined by my family physician, and the presence of a tumor, or enlargement of the spleen, was discovered. By December of that year my condition had become alarming, and in January, 1885, I had two attacks of vomiting blood, which was all but fatal. The Tumor of the Spleen by this time filled half of my abdomen, and was estimated to weigh about six pounds. Dropsy of the legs and body followed, and I became so prostrated as to be unable to sit up for many weeks. My skin took on the waxy pallor and yellow hue so characteristic of severe disease of the spleen, as my physician said. Besides my regular medical attendant, I had counsel from two other doctors, and no hope of recovery was held out to me. It was the opinion of all who saw me that, though I might live for a time, I would never regain strength or anything approaching good health.

At this time Burdock Blood Bitters was mentioned among remedies that might reduce the dropsy. Owing to the constant irritation in my stomach, it was difficult to take other remedies usually prescribed. So with the consent of my physician your Burdock Blood Bitters was tried—the first trial being favorable, it was continued, with the happy result of removing the dropsy entirely, and reducing to a very considerable extent the size of the tumor. It is now more than a year since I began to improve, and I am in very fair health, able to attend to many duties on the farm, and have gained in weight and strength beyond my expectations or the expectations of my friends. Yours sincerely,

Robert Kissick

Coulson, Ont., Canada.

[NOTE.—The likeness here presented is an exact copy of a photograph of Mr. Kissick since the above certificate was given, and represents that gentleman in the enjoyment of his usual health, and speaks volumes for the wonderful power of Burdock Blood Bitters over chronic disease. Mr. Kissick is a well-known Canadian farmer, and will answer all interested, who send stamp for reply.]

I have used Burdock Blood Bitters for the Kidney Complaint, and I found it to be the best medicine I ever took. It is without a rival.
