A BOUNTIFUL HAY CROP

Should give plenty of work for Hay Presses

THE DAIN HAY PRESS

has all the features which go to make up a practical machine.

Is built entirely of steel.

Is a pull power, not a push, as on others.

Is a full circle, with two feeds to the circle.

Is light draft because it has a compound leverage.

Wiring can be done from one side of the Press.

Guaranteed as represented.

Has pressed as high as 18 tons in 10 hours; will easily do from 10 to 12.

Puts full weight into ordinary car.

Write to-day if interested.

Press can be seen at Ottawa, Toronto and London Fairs.

Address, DAIN MFG. CO'Y, Preston, Ont.

A SOUND CANADIAN INSTITUTION IS

ITS STANDING AND OBJECTS

The sole object of this Company's existence is to furnish absolutely perfect protection to its Policyholders at the lowest possible cost.

Total assets, over eight millions; and surplus, over \$750,000, on Company standard of valuation and over \$1,000,000 on Government standard.

Over Forty Million Dollars Assurance in force; the year 1904 showing a net increase of over two millions.

This Company holds a higher Reserve than the Government standard calls for, invested in absolutely safe and non-speculative securities.

SOME ATTRACTIVE FEATURES

Lower expense rate than any other Canadian Company.

A very gratifying interest rate (5.09 per cent.), and funds all invested in gilt-edge Canadian securities.

Death rate in 1904 only 41 per cent. of the expected, showing great care exercised in acceptance of risks.

The Mutual Life produces all its business in Canada and Newfoundland, thus protecting its Policyholders against the heavy death losses sustained by some Companies in foreign countries.

The Mutual Life is controlled by its Policyholders—a source of great satisfaction in these days of stock manipulation.

Head Office, - Waterloo, Ont.

ROBERT MELVIN, President.

A. HOSKIN, K.C.

GEO. WEGENAST, Manager.

HON. JUSTICE BRITTON, } Vice Presidents.

W. H. RIDDELL, Secretary.

Remember the "Success" The Best Manure Spreader Made in the World.

HERE is a machine that does the most objectionable and disagreeable work that a farmer has to do, and relieves him of the heavy toil of spreading manures and fertilizers of all kinds.

The utility of the "Success" Spreader lies in its ability to economically distribute the manure over the farmer's acres. The manure is thoroughly pulverized and so evenly distributed that it is immediately available for the plant food. The "Success" is completely automatic—a small boy can operate from the seat—will spread a load in less than four minutes.

Made in four sizes, 30, 40, 50 and 70 bushels capacity.

Some reasons why the "Success" has the largest sale:

LIGHTEST DRAFT—direct chain drive makes draft 25% less.

DRIVE CHAIN is very heavy steel pinned and not a link is ever broken.

BEATER FREEING DEVICE insures easy and safe start and dispenses with the cumbersome end board.

REAR AXLE is larger than all others and one-third stronger.

GEAR AND SPROCKET keyed on axle at either end and machine drives from both ends.

ADJUSTABLE RAKE makes manure fine or coarse as desired. Will permit stones or other foreign substances to pass over the beater without causing a break.

APRON RETURN cause bottom to automatically return after load is discharged.

FOLLOW BOARD carries load against cylinder and insures even spread from start to finish.

CHANGE OF FEED made by a single movement of one lever.

STRENGTH—The "Success" is famous for durability and is strongly guaranteed.

You must buy a "Success" to get the best. It is the result of twenty-seven years' experience of the oldest and largest makers of manure spreaders in the world.
