Fairview Farms!

We are offering sons of Pontiac Korndyke, sire of the world's record Pontiac Clothilde DeKol 2nd, 37.20 lbs. butter in 7 days, and the sire of seven daughters that average 31.13 lbs. each in 7 days, equalled by no other sire living or dead. Also sons of Rag Apple Korndyke, whose dam, Pontiac Rag Apple, 31.62 lbs. butter in 7 days, is a full sister to the world's record cow, making these two full sisters' records average for the seven days 34.41 lbs. each, equalled by no other two full sisters of the breed. Also sons of Sir Johanna Colantha Gladi, whose dam and sire's dam average 33.61 lbs. each, which is higher than can be said of any other sire of the breed. Dams of many of these calves are high-record daughters of Pontiac Korndyke and Rag Apple Korndyke. Write me for breeding and price.

ing remarkably well at this rate, knocking out at the rate of £8 to £9 per week, a much higher rate of pay than many professional men get. The ringer killed and dressed a sheep in 1½ minutes. One man at Torrens, Queensland, dressed on a test 300 sheep in eight hours. The record aggregate kill at the Adelaide (S. A.) works, was 7,176 lambs in 6 hours and 50 minutes, for 80 men. The Australian record, however, is claimed by the Footscray (Vic.) works. Seventy operatives and 510 other employees, put through 8,008 sheep. The record kill for one man was 196.

After a hundred years, Australian pastoralists are beginning to discuss the question of hand-feeding sheep for wool. Hitherto the industry has been regarded as one that could only be carried on in big areas of cheap country. One more enterprising than the rest has been giving the results of a test, and he is convinced that to feed for wool would pay well. Something of this sort will have to be done directly, as scores of the big squattages are being divided up to satisfy the demand for land by small farmers. These men will grow some sheep, but mostly of the mutton breeds. Many have already grown feed for such flocks, but the raising of feed for wool is quite a new problem.

Extraordinary success has attended an experiment in the storing of apples and pears in sawdust, by Mrs. Spears, of Gulgong, N. S. W. The method is to pick the fruit carefully when nearly ripe, wrap it in tissue paper, and pack it in shallow cases filled with sawdust. In the test, the skin of the fruit did not wrinkle as is generally the case with fruit treated in cold storage. It is contended that fruit can, in this way, be kept from one season to the other. This season trials are to be made with soft fruits. J. S. D.

GOSSIP.

EVILS OF CAPITALISM.

Says the London, Ont., "Farmer's Advocate": "High interest and rental charges, due to the enormous price of land in the fruit districts, running up as high as a thousand dollars an acre, is one of the factors to which Canadian fruit-raisers point as limiting their profits when undertaking to justify maintenance of fruit prices by means of duties." "The Farmer's Advocate" has here struck on one of the fundamental injustices of capitalism. The actual workers get but a bare living wage or income. If there is anything more, the workers do not get it. It goes to the owners of the means of wealth production. High price of fruit does not raise the incomes of the fruit workers. It raises the revenues taken by the owners or mortgage-holders of fruit lands. The only remedy is to socialize the land as well as the other means of wealth production.—Cowansville Observer.

Volume 13, of the Holstein-Friesian Herdbook of Canada, containing also Volume 9 of the Record of Merit, has recently been issued from the press, and is a decided improvement to any of its predecessors in respect of its printing and binding, which are of excellent quality and finish. This volume contains pedigree records of bulls numbering from 7010 to 8597, and of cows numbering from 10363 to 12683, a total of 3,907; also, in the Record of Merit, the performance of 66 cows, numbering from 41 to 106. Long lists of members of the Association, and transfers of animals, together with very complete indexes, are also included. Secretary Clemons desires that we explain that the delay in getting this volume out was caused by the fact that after the larger portion was printed, it was found that the membership was increasing so rapidly that there were not nearly enough Herdbooks being printed for each member to receive the required copy. So 100 more copies had to be printed.

The Feed That Makes The Cream

Livingston's Oil Cake is the cheapest feed for cows—cheaper than corn, shorts or even hay. Because it actually increases the richness of cream—and also increases the amount of butter that you get out of the milk. Test your cows before and after feeding Livingston's Oil Cake for a month—and your "butter money" will show its economy.

Livingston's Oil Cakes contain from 8 to 12% of pure Linseed Oil—so soft enough to break into small bits—and are completely and easily digested. Write us for samples and prices if your dealer cannot supply you. Dominion Linseed Oil Co., Limited, 51 Mill Street, Montreal.
