## FROST FENCE

RECOGNIZED STANDARD OF ALL FENCES.  
STUBBORN FACTS HAVE PROVEN THIS. THERE IS A  
GREATER DEMAND FOR FROST FENCE THAN FOR ANY OTHER MAKE.

The enormous quantity now sold is the result of our many years of experience and careful study of the Fence question, and this backed up by skilled workmen whose work has to pass a rigid inspection, has produced a Fence that always satisfies the most exacting buyer.

There is no Government Standard as to the exact size of wire, or coat of galvanizing on it, to be used in fence, or no standard weight for fence. The Customs ruling as to size of wire admitted in this country from the U. S. duty free is that if too large to go in the No. 10 notch of a wire gauge it is passed as No. 9 size, and unfortunately for the dealer and farmer, every means by which weight and costs might be cut have been taken advantage of to the limit, and the makers seem to forget to tell why their fence is so cheap.

The buyers and users of Woven Fence to-day recognize only two classes. The one class is known as Ring Lock Fence which comprises practically all other Woven Fences with the exception of the "FROST," the Fence in a class of its own, made from Canadian wire, with that neat, double-wrap, non-slip lock, which is so different that it cannot be imitated and at the same time is recognized better than all others.

Frost Fences are wholly made in our own country, right from the drawing, tempering and galvanizing of the wire to the neat, tight bundle of Fence ready for shipment. The only foreign material used in the make-up is the wire rod which is not produced in Canada for sale, and which of necessity has to be purchased in the United States. Both our wire making and weaving processes of manufacture are carried on under the most careful inspection so that we are satisfied that every order which leaves our factory means a permanent customer, which to a great extent explains our large increase of business from year to year.

We do not ask that prospective purchasers of Wire Fence accept our word for the above, but what we do ask and what we think it is to every Fence buyer's advantage is this: let us explain fully to you just how Frost Fence is manufactured, how we look after every little detail, and if possible, we would be glad to have you see for yourself the different steps in turning out the proper article in the Fence line. If we have a chance to show you this, then we know that you will decide for yourself that Woven Frost Fence, carefully woven from exactly right Frost Wire, is the Fence that you most require.

We are always ready to give you the fullest information we possibly can give about the line that we handle, and a postal at any time will receive immediate attention, or if necessary, will bring you a near-by agent who will be glad to quote you on any of your requirements. There is a limited amount of unrepresented territory still to be had, and this is a fine chance for anyone with a little spare time to devote to a profitable agency which includes all styles of fancy fence, gates and everything in the wire line.
