This composition has been upwards of, three years etten-sively used in New Branswick, Newfoundhaud and Prince Edwards Island, the Canadas and Nova Scoip, principally for covering shingled roofs, as you will perceive by the accompanying circulars of certificates. It has been severely tasted, and proved most success-fully the tips proof qualities under most extraordinary circumstances; so much so, that I am of opinion that Fire Insurance Companies should encourage its general application to all kinds of wood building (where, the cofor would be no objection to its being used, such as the back valls of dwellings in the city, out houses, ware-houses, &c., as well as the roots by lowering the presium of insurance on such buildings as are powered.
