

## HUSBAND SAVED HIS WIFE

Stopped Most Terrible Suffering by Getting Her Lydia E. Pinkham's Vegetable Compound.

Denison, Texas.—"After my little girl was born two years ago I began suffering with female trouble and could hardly do my work. I was very nervous but just kept dragging on until last summer when I got where I could not do my work. I would have a chill every day and hot flashes and dizzy spells and my head would almost burst. I got where I was almost a walking skeleton and life was a burden to me until one day my husband's step-sister told my husband if he did not do something for me I would not last long and told him to get your medicine. So he got Lydia E. Pinkham's Vegetable Compound for me, and after taking the first three doses I began to improve. I continued its use, and I have never had any female trouble since. I feel that I owe my life to you and your remedies. They did for me what doctors could not do and I will always praise it wherever I go."—Mrs. G. O. LOWERY, 419 W. Monterey Street, Denison, Texas.

If you are suffering from any form of female ills, get a bottle of Lydia E. Pinkham's Vegetable Compound, and commence the treatment without delay.

### CHARGED WITH MURDER

The charge of murder was preferred against John O'Brien and Everett Carland in the St. John police court Tuesday, on information laid by Robert Harris, who deposed that he believes the defendants caused the death of his son Robert Harris, jr., by batting and striking him, causing injuries from which he died. The prisoners are plumbers, who have been on strike since May 1, and the victim was an apprentice plumber, who did not join the strikers. O'Brien and Carland, who are in jail on charge of intimidation, were witnesses at the coroner's inquest, but pleaded ignorance of the attack on Harris.

Every 10c Packet of  
**WILSON'S FLY PADS**  
WILL KILL MORE FLIES THAN \$2.00 WORTH OF ANY STICKY FLY CATCHER

Clean to handle. Sold by all Druggists, Grocers and General Stores.

**MAIL CONTRACT**

SEALED TENDERS, addressed to the Postmaster General, will be received at Ottawa until noon, on Friday, the 17th August, 1917, for the conveyance of His Majesty's Mails, on a proposed Contract for four years, 6 times per week on the route Blackville and Kirkwood from the 1st October next.

Printed notices containing further information as to conditions of proposed Contract may be seen and blank forms of Tender may be obtained at the Post Office of Blackville and route office, and at the office of the Post Office Inspector, Post Office Inspector's Office, St. John, N. B., July 26, 1917.

## Sewer Extension for Upper End of Town

(Continued from Page 3)

The vote on Ald. Durick's amendment was then taken, and resulted as follows:

Yea—Ald. Doyle, Durick, Sargeant.  
Nay—Ald. Kingston, John Russell, P. Russell, Ritchie and Troy.

The motion was then put and was defeated without division.

Ald. Sargeant explained that when he had made his first motion he had fully intended to have water main changed from four inch to 6 inch.

Mr. Fish's second report was then taken up.

Ald. P. Russell moved, That the report be received and council authorized to go ahead and build the sewer. Seconded by Ald. John Russell.

Ald. Ritchie asked if Pleasant Street sewer was not overtaxed now, and would it not, if extended, need another outlet. He would like to have some information from Mr. Fish on this matter.

Ald. Doyle moved That Mr. Fish be heard on the matter. Seconded by Ald. Kingston and carried.

Mr. Fish said that, previous to his putting down the matter of water and sewerage on Jane Street with the railway authorities, as the Board of Trade and especially the Board of Health were negotiating with the railway in the matter. Therefore the Light and Water Committee had not written the railway since the last council meeting.

Ald. Durick did not think that Ald. John Russell, as chairman of a committee, had any right to disregard or countermand the instructions of the council.

On the Mayor's suggestion, Ald. Durick moved That the Town Clerk be authorized to write the C. G. R. on the matter.

The Mayor said that after consulting some of the Aldermen, he had waited on General Manager Hayes about a month ago and proposed to him that the C. G. R. put in water and sewerage on Jane Street, the town to remit all rates thereon until cost of construction was repaid. Mr. Hayes' last letter to him was to the effect that the further working out of the matter would be left to assistant manager Brown. He had not heard from Mr. Brown.

Ald. John Russell said that this was news to him. But the Board of Trade had dealt with the same matter some time ago, and had sent delegates to Moncton, backed up by a strong letter from the Board of Health, to interview the railway authorities. Consideration had been promised them, and that was why he felt that he town council should not, at this stage, take up the matter.

The Mayor said that no one alderman should put his conclusions before those of the committee.

Ald. Sargeant moved, seconded by Ald. Doyle, That the Light & Water Committee have an extension of time to write the C. G. R. about Jane Street water and sewerage.

Ald. Durick thought that the committee should keep on hammering for what they wanted.

Motion carried.  
Adjourned.

Mr. Fish—Yes.  
Ald. Sargeant—What is the reason that the manhole at Street's Corner where Dr. Sproul now lives, half fills when there is a big run of water?

Mr. Fish said he did not know just where the trouble was. But he supposed that waste water must be getting into that sewer somewhere. He did not see that a larger outlet was needed.

The Mayor—There is sometimes three or four feet of water in the manhole near R. H. Armstrong's.

Mr. Fish said this would be due to a temporary block.

The motion that the council proceed to build the sewer under consideration was adopted, Ald. Ritchie voting nay.

Ald. Doyle moved That a donation of \$50 be granted the band for a concert once a week until October 1st.

This was seconded by Ald. John Russell and carried unanimously.

The Mayor said that Miss Craig had complained to him about the overflow of the spring in Mrs. Craig's field, which spring is claimed by the town, flooding her garden and sometimes her cellar. The water also interfered with the property of John Kingston, Sr. Could not that spring in Mrs. Craig's field, he asked Mr. Fish, be piped over to Brown's Brook?

Mr. Fish replied that the natural outlet for that water is the valley across the Manse property, thence back to the Orange Hall, and on down through the Davidson property. To take care of it would mean going on to private property. He presumed that, under the rights possessed by the old firewardens, the town could handle the water.

The Mayor recommended that a motion be passed authorizing the Public Works Committee to go with Mr. Fish and look into the matter.

Ald. P. Russell said that a wooden pipe of 8 or 9 inches used to run from that spring. It is now probably filled up. Either a terra cotta pipe should be put in on the tank filled up. People should look after the water on their own property.

Ald. Sargeant understood that the town owns the right of way to that spring.

Ald. P. Russell disagreed with this view of the matter.

Ald. Doyle said that it was claimed some years ago that Kingston and Stables had stopped the drain from that spring. The town had no right, he thought, to look after the overflow on private property. But the town ought to help. A pipe to Brown's Brook would not solve the problem, as there are several springs in the vicinity.

Ald. Troy moved That the Public Works Committee confer with Mr. Fish re the Craig well and make a recommendation at next meeting. Seconded by Ald. Ritchie and carried.

Ald. Kingston disagreed with Ald. Doyle's statement about Kingston and Stables blocking the drain. Some years ago Ald. Doyle had sent men to make a drain through his (King-

## FELT LIKE A NEW PERSON

After Taking Only One Box Of "Fruit-a-tives"

EAST SHIP HARBOUR, N. S.  
"It is with great pleasure that I write to tell you of the wonderful benefits I have received from taking 'Fruit-a-tives'. For years, I was a dreadful sufferer from Constipation and Headaches, and I was miserable in every way. Nothing in the way of medicines seemed to help me. Then I finally tried 'Fruit-a-tives' and the effect was splendid. After taking one box, I feel like a new person, to have relief from those sickening Headaches."

Mrs. MARTHA DEWOLFE.

ston's father's property.

Ald. Durick asked if the Light & Water Committee had any reply from the C. G. R. authorities re water and sewerage on Jane Street.

Ald. John Russell said that he did not consider it wise for the Town to open up the matter of water and sewerage on Jane Street with the railway authorities, as the Board of Trade and especially the Board of Health were negotiating with the railway in the matter. Therefore the Light and Water Committee had not written the railway since the last council meeting.

Ald. Durick did not think that Ald. John Russell, as chairman of a committee, had any right to disregard or countermand the instructions of the council.

On the Mayor's suggestion, Ald. Durick moved That the Town Clerk be authorized to write the C. G. R. on the matter.

The Mayor said that after consulting some of the Aldermen, he had waited on General Manager Hayes about a month ago and proposed to him that the C. G. R. put in water and sewerage on Jane Street, the town to remit all rates thereon until cost of construction was repaid. Ald. Sargeant moved, seconded by Ald. Doyle, That the Light & Water Committee have an extension of time to write the C. G. R. about Jane Street water and sewerage.

Ald. Durick thought that the committee should keep on hammering for what they wanted.

Motion carried.  
Adjourned.

**The Story Of The Stairs**

Every time you go up stairs you test your state of health—the condition of your blood.

Do you arrive at the top of the stairs breathless and distressed? Does your heart palpitate violently? Do you have a pain in your side? Perhaps you even have to stop half way up, too exhausted to go further without resting. These are untelling signs of anaemia. As soon as your blood becomes impoverished or impure the stair-case becomes an instrument of torture. When this is so you are unfit for work; your blood is watery and your nerves exhausted, you are losing the joy of an active life and paving the way for a further breakdown and decline. In this condition only one thing can save you. You must put new, rich, red blood into your veins without further delay and so build up your health anew. To get this new, rich blood give Dr. Williams' Pink Pills a fair trial, and they will give you new vitality, sound health, and the power to resist and throw off disease. For more than a generation this favorite medicine has been in use throughout the world and has made many thousands of weak, despondent men and women bright, active and strong.

You can get Dr. Williams' Pink Pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont. (adv.)

**PROTECTION OF CROPS**  
Crop protection means crop production. Canada loses over one hundred million dollars worth of her staple crops every year through the depredations of insect pests. A large portion of this loss could be prevented. As we cannot afford to lose the smallest portion of our grain and other food crops during the present critical period when the production of food is of supreme importance, the Dominion Department of Agriculture is making every effort to prevent, so far as possible, losses due to insect pests. Crop protection must go hand in hand with crop production.

Insect pests are not usually noticed or reported until they have caused considerable damage. Therefore it is urged that the closest watch be kept on all crops for the first appearance of any insect pests or damage. Immediately such damage is observed steps should be taken to control the outbreak in its incipient stage. If the pest or the method of control is unknown specimens of the insect and its injuries should be sent at once to the nearest of the following sources of expert assistance: The Agricultural Colleges, the Provincial Departments of Agriculture or their local District Representatives, or direct to the Dominion Entomologist, Department of Agriculture, Ottawa, for examination and advice in regard to control measures to be furnished without delay. Letters and packages up to 11 ounces in weight may be mailed to the Dominion Entomologist "Free," but postage will be required on letters or specimens sent to the other sources of advice mentioned.

Do not delay reporting insect outbreak or sending inquiries; delay may involve serious losses that could otherwise be prevented. Write immediately, or telegraph if the outbreak is serious. Clean farming, the securing of vigorous growth in young plants and good cultivation are the best protective measures against insect attack. Keep all crops constantly under supervision for the first appearance of insect pests. Keep all crops constantly under supervision for the first appearance of any damage in order that

it may be checked without delay. Increased crop production involves increased protection against pests.

**FINLAND DECLARES INDEPENDENCE**  
Helsinki, July 21—The bill whereby Finland seeks to wrest complete independence from Russia was adopted by the Diet amidst scenes of unexampled enthusiasm and solemnity.

A conflict with Russia is regarded as inevitable because of the faction of the Finnish Diet in adopting a bill granting independence to Finland. The Socialist members of Parliament assert that Petrograd has its hands too full with its own troubles to attempt repression.

The Diet rejected, 104 against 87, a proposal by M. Talas, member of the young Finnish party, that the law as prescribed by the constitution be submitted for Russia's approval or veto.

A final vote was taken on the resolution of M. Hornberg, member of the Swedish party, the import of which was that the Diet reserve the right to break the last bonds with Russia. The Hornberg resolution was defeated chiefly by the vote of the Socialists themselves, who stand for the policy, but object to following the initiative of the non-Socialist parties.

**It Works! Try It**

Tells how to loosen a sore, tender corn so it lifts out without pain.

Good news spreads rapidly and druggists here are kept busy dispensing Irezone, the ether discovery of a Cincinnati man, which is said to loosen any corn so it lifts out with the fingers. Ask at any pharmacy for a quarter ounce of Irezone, which will cost very little, but is said to be sufficient to rid one's feet of every hard or soft corn or callus.

You apply just a few drops on the tender, aching corn and instantly the soreness is relieved, and soon the corn is so softened that it lifts out without pain. It is a sticky substance which dries when applied and never inflames or even irritates the adjoining tissue.

This discovery will prevent thousands of deaths annually from lockjaw and infection heretofore resulting from the suicidal habit of cutting corns.

## PROTECTION OF CROPS

Crop protection means crop production. Canada loses over one hundred million dollars worth of her staple crops every year through the depredations of insect pests. **Studebaker**

Before you buy any car  
Investigate the Canadian Built  
Studebaker Car

**YOUR** car is probably the second most important investment you will ever make. **FIRST**—comes your home. **THEN**—your car. Before you buy that car stop and think. Are you going to be completely satisfied with it? Is it sure to be the comfortable car you want? Motor car comfort has been a thing of slow development. It means more than the physical ease of a fireside chair.

**POWER** is the first factor of automobile comfort. No man can be thoroughly comfortable in his car if he has to be continually pushing pedals and pulling levers. You want a car that will climb the hills and pull through mud and sand without appreciable effort; a car that will take you anywhere with a minimum shifting of gears.

The Studebaker FOUR has full 40 Horse Power—the Studebaker SIX has full 50 Horse Power. Both cars are built in Studebaker factories at Walkerville, Ontario. They are probably the most powerful cars of their weight on the market today.

**ROADABILITY** is a point of automobile comfort. You want an easy driving car, one that does not jump and sway and make you work to hold it in the road. The perfect balance of the Studebaker chassis, the basic design of which has been continually improved and refined over a period of four years, makes the Studebaker car one of the most roadable cars in the world. A Studebaker car drives straight as an arrow and has no tendency to jump or sway.

**DEPENDABILITY** is another point of automobile comfort. Studebaker uses the best vanadium steel in its chassis construction. Studebaker uses drop forgings wherever possible to add strength and lightness.

The use of high grade materials and of skilled, experienced labor makes for the mechanical perfection of Studebaker cars—which in turn makes for unusual durability.

Studebaker brakes are oversize—the area of braking surface is very large. A slight pressure on a Studebaker brake will bring you to a gentle halt, a stronger pressure will stop you within a few feet.

Think how it will add to your comfort to know that yours is a durable car with thoroughly dependable brakes.

**ECONOMY** is also a factor. It is always comfortable to know that your up-keep bills are going to be low.

Studebaker cars with all their power are very economical in their consumption of gasoline.

Studebaker owners frequently report from 8,000 to 10,000 miles on a single set of tires.

**APPEARANCE.** You can never be comfortable in a car that needs apology. Studebaker cars are big and handsome. Their finish of gunmetal gray with ivory striping makes them distinctive in appearance.

**FINALLY** there is the question of physical convenience and comfort.

The driver of a Studebaker car has everything at his finger tips. His hand falls naturally on the levers, the pedals may be adjusted to suit his individual requirements, electric starting and lighting switches are conveniently placed on the dash within easy reach of the driver; the starter pedal is directly under his right heel.

The front seats of Studebaker cars are individual and form-fitting, adjustable forward and back to all leg lengths. The seat next the driver is reversible, its occupant may face the tonneau if desired. The tonneau doors are 21½ inches wide—easy to enter or leave. The tonneau seat is 48 inches wide, the ideal width for three. There are two auxiliary seats under the tonneau seat for your convenience should you want to carry extra passengers.

All cushion work is of the best long curled hair mounted on resilient spiral springs.

All upholstery is of genuine, high grade hand buffed leather. Each seat in a Studebaker car invites rest and relaxation.

You certainly owe it to yourself to investigate the Studebaker car before coming to a decision as to what your car will be.

There will be no change in Studebaker models this year, but the increased cost of materials and labor may force Studebaker to make an advance in prices at any time without notice.

"Built in Studebaker Factories at Walkerville, Ont."
