part of the Harbor.

E. J. BRENNAN.

N. B.—I would respectfully invite both

permanent and casual poor to give me

a call with their orders, and they will

find it to their advantage. This is a

free country and the poor ought to en-

joy the privilege, at least, of spending

orders where they please. Don't mind

where the Government officials may

send you, go where it suits yourself,

they have no power to send you any

where in particular. There is money

in it and we must have our share or

at least chance for it.

NOTICE.—This paper will not be de-

livered to any subscriber for a less term

than six months—single copies four-

pence.

All correspondence intended for pub-

lication must be sent in not later than

Wednesday evening.

### HOUSE OF ASSEMBLY.

WEDNESDAY, March 16.

Continued

Mr Kent—It was most satisfactory to

find that the original offer had been so

materially reduced. The most sanguine

of us recognised the fact that we could

not go on in our present course, and hope

to avoid misfortune. At present the

sons of Newfoundland could not find em-

ployment within her shores. Strong and

injust men, willing and able to work

were almost starving, and that in the

very neighborhood of St. John's. He

believed that the projected railroad

would cure this terrible evil, an evil that

had been steadily growing for many

years.

Mr Shea was glad to see the petitions

which had been presented to the House,

and to find that the people had become

alive to their own interests, and had

abandoned the old role and which the

Legislature was left to consult the dumb

oracle. Complaints had frequently been

made of the barren results of our Legis-

lative deliberations, but if the people

knowing their own wants, and the ne-

cessities of the country, would more fre-

quently inform the House of these by

petition, it would be found that our

Legislature would more frequently har-

monize public opinion. If we fail in this

particular owing to want of knowledge

or information, the blame rests not so

much upon us as upon the people them-

selves. He did not contend for undue

and inconsiderate haste, for we are

bound to see and ascertain the bearing

of the result of this measure on the in-

terests of all classes, interests which are

so intermixed and bound up one with

another that injury to one class will

work injury to another. Some people say

in reply to this, are you certain that all

the benefits you anticipate are going to

flow from this undertaking? Our answer

to them is No. Of this, however, we can

be certain; that we have a large unem-

ployed population who are waiting bread

We are reasonably confident of the value

of our latent resources. We know that

Tilt Cove has been highly successful.

We are justified in assuming that we are

on the threshold of our mining

developments. And that there are prob-

ably hundreds of Bets Coves in the

country. We believe that the opera-

tions of agriculture will greatly relieve

the people, and that the labor of our

people in that quarter will happily result

in comparative independence. In con-

sequence of the depressed condition of

trade it was generally understood that

supplies would not be issued to their

usual extent. Many persons who are de-

pendent upon the fisheries will be com-

pelled to seek employment in some

other way. He hoped that the arrange-

ments would be of such a nature as to

enable the company to commence opera-

tions during the coming summer.

The Financial Secretary referred at

some length to the benefits which had

been derived from the prosecution of the

Seal fishery by the Dun-see Seal and

Whaling Company, and from the opening

up of other sources of industry; and

gave it as his opinion that the Railway

would result in vastly increasing the

prosperity of the country.

The Committee thereupon rose and the Chairman reported that some progress had been made, and asked leave to sit again on Monday next.

The resolution that had just passed affirmed the principle. The principle having been affirmed he did not intend asking the house on this occasion to go into consideration of the details and in order that an opportunity might be given for the fullest consideration and discussion of those details he intended moving that the committee rise.

Mr Parsons presented a petition from a number of the inhabitants of Monks Town, on the subject of sewerage.

Mr Kent supported the prayer of the petitioners. There was another matter which he wished to call the attention of the Chairman of the Board of Works to. A sewer lately constructed emptied its contents into Kenne's River in the neighborhood of a thickly populated district. If fever resulted, the consequences might be very serious. He would like to see a comprehensive system of sewerage adopted which would end all complaints.

Mr Tessier presented a petition from Mr Alexander Smith, which was numerously signed, praying for a grant of a small sum of money, to enable him to erect a Grist Mill.

Hon Receiver General supported the petition.

Mr Lessier also presented a petition from John Lester and a large number of farmers in the Western district, praying that a wharf might be erected in the neighborhood of River Head which would enable them to get manure with little trouble.

Mr Scott expressed his pleasure in giving his support to both the petitions presented by his hon colleague Mr Tessier.

### PETITIONS AND NOTICES OF MOTION

Dr Skelton presented a petition from Robert Green and others of Pinchard's Island, praying for a grant of money to deepen the Gut there.

Mr Carter presented a petition from George Minty and others, Methodists of Twillingate, South Side, praying for a grant of land for a burial place there.

Chairman Board of Works presented a petition from the inhabitants of Fortune Bay, upon the subject of the Herring Fishery.

Hon Receiver General had much pleasure in presenting four petitions in favor of the railway emanating from Harbor Grace. They were universally signed by the inhabitants of that district of all classes and professions.

Mr Norman presented a petition from the District of Brigus upon the same subject.

Mr Winter presented a petition from Charles Balleit and others of Burn, which was read and ordered to lie on the table.

Dr Skelton presented a petition from Thomas Kough and others of Plate Cove, from Levi Barry and others of Piper's Cove, Bloody Bay, and from George Holmott and others of Green Island Cove and Exploits, on the subject of the repair and extension of roads and bridges in these several localities.

Mr Penny presented petitions from Eli Killonay and others of Spout Cove, from William Doyle and others of Gall Island Cove, from Richard J. Ford and others of Red Lands, from Elija Quaker and others of Spout Cove, and from William Garland and others of Cann Island Cove, all of which were on motion laid on the table of the House.

Mr Rice gave notice that he would, on tomorrow move an Address to His Excellency the Governor on the subject of a ferry at Main Tickle, as embodied in a petition from the inhabitants of Twillingate and the neighboring harbors.

Ordered that this petition do lie on the table.

Moved and seconded that the House on rising do adjourn till Friday next.

The House then adjourned till Friday next at half-past three o'clock.

Friday, March 18.

The house opened to-day pursuant to adjournment at half-past three o'clock.

Hon Mr Shea presented a petition from the Harbor Grace Water Company praying that the Act might be modified so as to permit an increase of their capital stock. It was necessary to increase the supply of Water in Harbor Grace, and for that purpose new pipes would have to be laid at considerable expense to the company.

Hon Mr Shea also presented petitions from Jeffrey Ryan and others of Spaniards Bay, Reuben Miron and others of Bay Roberts, John Noel and others of Harbor Grace, South Side, praying for a grant to extend and repair roads and bridges.

Mr MacKay presented a petition from the inhabitants of LaPole and

the neighboring settlements, praying that a light-house may be erected at the entrance of that Bay. He presented a similar petition on last session and had the assurance of the Executive that the Inspector of Light-houses would visit the place and report upon the matter. The building of a light house in compliance with the prayer of petitioners he considered would be of advantage, not only to the residents of that locality but to the country generally.

Mr Kent presented a petition from the inhabitants of Boylston on the erection of a pump there and praying for sewerage accommodation. On last year he presented a similar petition, the only objection to which appeared to be the selection of a suitable site. This difficulty he thought would be easily overcome, and the prayer of petitioners be acceded to as early as possible.

Mr O'Mara supported the prayer of the petition.

The House then resolved itself into Committee of the Whole on Ways and Means, whereupon in a long discussion ensued, Messrs Parsons, Kent and Scott speak at great length, after which the Committee rose and reported the Resolutions as carried without amendment.

Hon Receiver General in accordance with the Resolutions, presented a Bill for granting to Her Majesty certain duties on Wares and Merchandise imported into this colony.

Pursuant to the order of the day, the Bill relating to Probate and Administration was then read a first time.

The house then adjourned till Monday next at half-past three o'clock.

Monday March 21.

Pursuant to adjournment the house met today at 3 o'clock.

Hon Mr Rorke presented a petition from the inhabitants of Carbonear, upon the subject of the proposed railway. The petition is signed by four hundred of the inhabitants of that place. Last year Carbonear was not thought worthy of notice in considering that matter. Seeing that it would form a great connecting link with an immense population residing upon the south side of Trinity Bay, he trusted that the contractors would recognize it to be to their interest to run a branch line there. The number of our unemployed people, and the absence of any hope other wise than from such a source as this great scheme shadows forth was one of the reasons which induced the initiation of this measure. It was contended and truly so, that the fisheries of the present day were not sufficient in competition with the active rivalry of foreign markets to meet the wants of the people. The merchants unfortunately find that they cannot carry on business with any profit to themselves and under existing circumstances. If things go on as they have gone the past few years they will find it impossible to afford relief to those now pressing upon them. It was therefore thought that the only possible way to meet such a condition of things was by the opening up of our dormant mineral and agricultural resources. He would give the measure his hearty support.
