Slight Blaze at Anglo-**American Bakery**

A fire, which might have resulted disastrously but for the promptness and systematic work of the Central and Western Fire Companies, occur-red at the Anglo-American Bakery Cuddihy Street, shortly before eight o'clock last evening. The blaze was evidently due to the igniting of the partition between the furnace and gas engine in the basement of the buildthe subsequent explosion of the gas bag used to feed the engine. While he employees were busy working up the dough for the night's work, one of them noticed smoke issuing from the basement through the floor into in from box 32 and the Central and Western firemen were on the scene promptly. In the meantime Mr. John Young, the foreman of the bakery, with great presence of mind, had shut off the supply of gas from the main pipe and so confined the area of the flame. On the arrival of the firemen two streams of water were directed on the blaze which was soon under control, much to the relief of the residents in the adjoining range of houses The all-out signal sounded at 8.23 ess than half an hour after the alarm was sent in. Very little damage was done except to the machinery, principal loss being the burning belting and the corroding of the en-gine due to the streams of water directed on the blaze, which was confined to that section where the engine stood.
