Simultaneously with the announcement that Lord Falmouth intends to retire from the turf comes the statement that the czar of Russia will send a racing stud to Eng-land. When one goes out another comes in. Racing is too firmly established to be damaged materially and lastingly by the detection of one man, even though that one man be the most enthusiastic and honorable devote of his time. That Lord Falmouth's retirement will be a great mis-fortune to the English race course, no one will gainsay, but in the ordinary course of events he was bound to take his leave of a sport that has known him so long. Others cually as great and equally as generous and enterprising have gone before, but the turf has recovered the shock. What is Catarrh?

From the Mail (Canada) Dec. 15, Catarrh is a muco-purulent discharge caused by the presence and development of the vege-table parasite amaba in the internal lining membrane of the nose. This parasite is only developed under favorable circumstances, and these are: Morbid state of the blood, as the blichted corunsel of tuberela the germ paison

These poisons keep the internal lining membrane of the nose in a con-stant state of irritation, ever ready for the de-posit of the seeds of these germs, which spread up the nostrils and down the fauces or back of the threat, causing ulceration of the threat, up the eustachian tubes, causing deafness, burrowing in the vocal cords, causing deafness, burrowing in the vocal cords, causing hoarse-ness; usurping the proper structure of the bronchial tubes, ending in pulmonary con-sumption and death. Many attempts have been made to discover a cure for this distressing discase by the use of inhalants and other ingenious devices, but none of these treatments can do a particle of good until the parasites are either destroyed or removed from the mucous tissue. Some time since a well known physician of forty years' standing, after much experiment-ing, succeeded in discovering the necessary combination of ingredients which never falls in absolutely and permanently eradicating this horrible disease, whether standing for one year or forty years. Those who may be suf-fering from the above disease should, without delay, communicate with the business man-agers, Messers, A. H. Dixon & Son, 305 King street west, Toronto, and get full particulars and treatise free by enclosing stamp.
