

OF COURSE

We use only high quality materials and employ expert workmen in producing

A Cream Separator

that has many distinctive and exclusive improvements

But

the one main feature in the ANKER-HOLTH that puts it in a class by itself is the ability of the bowl

To Balance Itself

COMPLETE PROTECTION

Pure, wholesome and unadulterated milk and milk products are very nourishing foods. And as such require adequate protection from harmful bacteria and infections. Upon the food value of these products depend the price and the demand, consequently no nutritive quality should be lost.

The sanitary cleanliness evolved by

Wyandotte
Dairyman's
Cleaner and Cleanser

insures separators, milk cans, churns and milking machines free from objectionable and injurious matter, and a milk product of the same original high quality produced by the cow. Odors, flavors and sourness that are so easily transmitted to the absorbant milk and its co-related products will also be prevented by the thorough and effective cleanliness produced by this material.

Indian in Circle

On Every Package

The low cost of using this cleaner places it within the reach of every dairyman and creameryman.

Your supply man will fill your order.

IT CLEANS CLEAN!
