The Mechanical Superiority

OF THE

MASON & RISCH PIANOS

Of a necessity deals with technical terms, with which few, except experts, are familiar. What the public mainly base their verdict upon is results. The question is---In what does the complete instrument excel? Briefly then in

TOPE, TOUCH AND DURABILITY.

These instruments possess a pure, rich, sonorous quality of tone throughout. The treble and tenor is liquid, brilliant and melodious; the base is deep, clear and rich; while the touch is delicate, prompt and elastic.

Being constructed of the very best materials, upon principles and methods incompatible with destructibility; with the crucial test of use for a decade in evidence, there are ample grounds for our claim of extraordinary durability.

Are you interested in Pianos either as a connoisseur, or as a prospective buyer?

Do us the favor to test our instruments thoroughly before selecting.

LET MERIT TELL THE STORY.

MASON & RISCH

32 King St. West, TORONTO.
