

PART 9 - TEST FOR BEDDING COMPONENTS

1 Application

Where bedding components are required to have qualities of resistance to the ignition and propagation of flame, the bedding components shall comply with this part.

2 Fire test procedure

The bedding components shall be tested and evaluated in accordance with the fire test procedure specified in resolution A.688(17).

3 Additional requirements

The tests shall be made by using specimens of the final product (e.g. with colour treatment). In cases where only the colours change, a new test is not necessary. However, in cases where the basis product or the treatment procedure change, a new test is required.
