THE GERMAN NAVY IS ON THE RUN!

NO UNDUE INCREASE IN COST OF FOOD WILL BE ALLOWED IN CANADA

PREPARE FOR THE GREAT CHANGE BRITISH FLEET

The Great Dislocation in Europe has changed things forever, and in the akling of an eye. There is to be a new world henceforth.

"And I saw a new heaven and a new earth: for the first heaven and the first earth were passed away."

It is the recognition of this great and revolutionary fact that will test us all. This revolution will show itself in many things, and each man and woman, each business and interest, every occupation and cast of thought, each nation and race must read the change for its own guidance. As individuals, or as organizations, we may have, some forthwith, some a little later on, to adjust ourselves to the great changes that are at hand.

All kinds of things that have delayed too long their going, had come to think of their establishment as beyond question, will have suddenly to depart.

From now on there will be great revolutions in government, in mapmaking, in the association of nations, in political economy, in finance, in human conditions generally. Perhaps the Madman of Berlin is but the match that has fired the mine!

And our statesmen ought to be the first to see the changes and to anticipate them: at least, to meet them. Wooden men, trained in the past, and who cannot even read the past, will be least able to guide the future. So in finance, in production and distribution, in almost every department of human organization.

Let us try and shed a ray of light on what we are urging, say in the greater politics of the English-speaking nations—Great Britain and the United States. We have completed a hundred years of peace under many discouraging conditions. We believe, with the great change now at hand, it will mean a closer and better understanding, if not a closer union. MORE UNION is the first clear note. The two parties—the four parties—got together in England when the King summoned them to meet, nominally over the Irish situation. Uister and Nationalist have got together. So Liberal and Unionist. We are getting Liberal and Conservative together in Canada, notwithstanding that some of our wooden-headed men and papers are talking about the defeat of the Emergency Vote of thirty-five millions. Those who urged getting together then need no vindication now.

Canada must get together as the mother country has got together, and Britain and the United States must get closer. The peril of our kinsmen is ours, whether it be free government or finance, human uplift or brotherhood, leader-snip in molding a world-wide public opinion or giving any and every individual a chance to do his best in his own beat.

There is a great new outlook for Britain and or the United States, and for all who speak our inaguage. We wont the proples who speak institution of the Canadian troops in a correct of things. And all these may be about to happen. In the rea a better based of exchange than boxes of gold shooting across the Atlantic like shuttles as for exchange than boxes of gold shooting across the Atlantic like shuttles as for exchange than boxes of gold shooting across the Atlantic like shuttles as for exchange than boxes of gold shooting across the Atlantic like shuttles as for exchange than boxes of gold shooting across the Atlantic like shuttles as for exchange than boxes of gold shooting across the Atlantic like shuttles as for exchange than boxes of gold shooting across the Atlantic like shuttles as for exchange than boxes of gold shooting across the Atlantic like shuttles as for exchange than boxes of gold shooting across the Atlantic like shuttles as for exchange than boxes of gold shooting across the Atlantic like shuttles as for exchange than boxes of gold shooting across the Atlantic like shuttles as for exchange than boxes of gold shooting across the Atlantic like shuttles as for exchange than boxes of gold shooting across the Atlantic like shuttles as for exchange than boxes of gold shooting across the Atlantic like shuttles as for exchange than boxes of gold shooting across the Atlantic like shuttles as for exchange than boxes of gold shooting across the Atlantic like shuttles as for exchange than boxes of gold shooting across the Atlantic like shuttles as for exchange than boxes of gold shooting across the Atlantic like shuttles as gold as for exchange than boxes of gold shooting across the Atlantic like shuttles as gold as for exchange than boxes of gold shooting across the Atlantic like shuttles as gold as for exchange than boxes of gold shooting across the Atlantic like shuttles as gold as for exchange than boxes of gold shooting across the Atlantic like as a splend and country and town problems of the canadi great road; and not only that, later on they even apparently gave seems to New York brokers and banks with whom they had a large credit to sell this same stock short; and in the last few days to make millions of money for themsame stock short; and in the last few days to make millions of money for themsame for this Wall street and this kind selves! Surely there is to be no more future for this Wall street and this kind of financing. It is one of the things that are about to disappear forever. What President Wilson has been working on for two years, and many other men in the States have been working on, viz., how to put an end to it, will probably find further efforts unnecessary. Wall street belongs to the days before the great further efforts unnecessary. Wall street belongs readjustment which is now under way!

Take next our parliamentary machine. Most of the parliaments concerned in this great war thruout the world are in session today. In less than two weeks we will have the Canadian Parliament at work; but surely it will never attempt to do business again in the methods of the past. We do not know of attempt to do business again in the methods of the past. We do not know of a more unworkable proposition; it had about become discredited, and the one thing that marked more than anything else Canadian parliamentary institutions as we have had them in recent years was the effort to shut them down and get the members away! All this must now be in the past, and the modern new parliamentary machine, whatever it is, will, as a result of the great dislocation, and as a result of the new readjustment, take on a new and better form, and seek to serve the country rather than party, and cease forever as it has been to the past in Canada a mere talking machine a machine that falks about in the past in Canada, a mere talking machine, a machine that talks about nothing but personal or local prejudices.

Do you notice that the English railways are in the hands of the govern-ent-brought about in less than twenty-four hours! They will never go back: when the war is over England will refund the securities and keep the property Who two weeks ago would have suggested public ownership in this respect

without a great struggle?

And among new things that are to come and may come rapidly is the dawn of a genuine movement to do away with war. There will be no more Kaisers after this experience. There will be no more of armament firms bedeviling newspapers and public bodies into voting war supplies and things of that kind. In the interval of readjustment, great organizations in the shape of army and navy, perhaps; but they will be purely of a police character, and not for war. The man who is bent on making war hereafter, and the nation bent on the same thing will be great. thing, will be caged.

And our belief is that if the present conflagration in Europe is not soon checked the United States in its own interest, if for no other interest, will also have to step in and become one of the allies for the complete suppression of the kalser and his mendacity, his duplicity, and his infernal ambition to dominate civilization by means of highly organized and scientific machines for human slaughter! The States is the last country to sit quiet when Caesarism is to

meet its Brutus!

The more one thinks of things, and the more you try to grasp what is going on: the more one seeks to appreciate the enormous problems that are before humanity, the more one is forced to admit that the great dislocation of which we have spoken is and was for the purpose of bringing about the great regeneration of civilization as we happen to know it in this fraction of this

WAR SUMMARY

The World asks its readers to remember that while every effort is being made to keep them in touch with the events of the war all that has yet transpired is only of the nature of preliminary and indecisive clashes. The Germans are only feeling their way into Belgium and at least a week will elapse before the real struyle commences. The Belgians have put up a brave resistance to the entry of the Gorman troops and have done incalculable service in delaying their incalculable service in delaying their

force the allies. Much depends on the naval engage-ment that is awaited with intense anx-iety. But here again unless the Ger-man fleet emerges from the protections tion of Germany's land fortifications, little can be done. It will take time eo prepare the way for the British fleet to challenge the German navy within its stronghold.

Special Direct Copyrighted Caple to
The Toronto World.

LONDON, Aug. 6.—One of the most
sensationel features of the day's derelopments has been Premier Asquith's
apposure, in the house of commons
his evening of what he characterized.

Was Gredit Vetal exposure, in the house of commons this evening, of what he characterized as the "infamous proposals" made to the British Government by Germany in its desperate efforts to induce Great Britain to take up an attitude of neu-

trality in regard to the war.

tain the "infamous proposals," was greated with round after round of cheering.

The premier made a brief reference to the appointment of Field Marshal Kitchener as secretary of war. He said that Earl Kitchener's connection with the government did not identify him with any political party. In a great public emergency he had responded to a great public call and he would have in the discharge of his most arduous task the complete confidence of all.

To increase the Army.

In behalf of Lord Kitchener, the premier asked power to increase the army by not less than half a million men.

"I am encouraged to ask this," he said, "not only by reason of our own sense of the gravity of the circumstances, but, the knowledge that India is prepared to send us two divisions, and everyone of the self-governing dominions has spontaneously tendered to the utmost limits of its possibility, both in "I am encouraged to ask this," he

War Credit Voted. There was another stirring scene when the house of commons was asked to vote a war credit amounting to £100,000,000 sterling (\$500,000,000). The enormous appropriation was passed almost in the twinkling of an eye, and with complete unanimity, the members rising and cheering vociferously.

Scheme.

The World has it on excellent au-Canadian Press Despatch.

LONDON, Aug 6.—An admiralty report says that the British cruiser Amphion was sunk this morning by striking a mine. Paymaster J. T. Gedge and 130 men were lost. The captain, 16 officers and 135 men were saved.

A previous report said that the German mine layer Koenigin Luise had probably placed some mines before she was sunk by the British torpedo boat Lance.

The World has it on excellent authority that a Canadian lady, who is married to a German military officer, and who has been over staying with her friends in Toronto, received a letter from her husband, date June 2, telling her that if she was returning to Germany she must hasten to do so, as all the ports would be closed by August 1, and it would be impossible for her to get into Germany after that date.

There seems to be no doubt from all
