THE

Manderer in America,

&c.

CHAP. I.

Emigration is a wholesome drain on a redundant population Burke.

IT is a subject of much, and indeed serious regret, that English writers, and would-be-considered American travellers, have been found so base, either from mercenary motives, or a decided and determined enmity to their native soil, that thousands of Britis! subjects have become sacrifices on the altar of such cupidity.

The most recent Authors of Travels in North America, since the works of the Duke de la Rouchesoucault, and Mr. Weld, are Messrs. Hall, Birkbeck, Fearon, Palmer, Bradbury, and Cobbett.
