See Eatonia Boots Being Made at the Exhibition

The demonstration in the Process Building, where you may see the famous Eatonia footwear being made from start to finish, is a source of the greatest interest to every man and woman, for here one may follow step by step the various stages through which these boots must pass before they are presented to you. You'll note the many processes that take place in building up the Eatonias, of which the average person has no idea—the pains and care that are required to give them that handsome, high-class appearance, and the excellent grade of material that's used through their construction. See the leather exhibit—examine the fine, soft quality—it's Clark's leather, known as the very best dongola kid, guaranteed not to crack. This excellent kid is made in Toronto, and if you want to test its superior wearing qualities try the Eatonia Boots. They're made for men and women, are perfect fitting, stylish and comfortable. Every pair Goodyear welted; all sizes; all one price. \$3.00
