Directly east of the tractor display will be seen the model feed silo with the new hip roof, allowing greater room when filling the silo. Another distinctive feature is known as the new style "end match," making a per-fectly airtight joint, which result is very essential in the keeping qualities of the ensilage. This well known model feed silo is used on the O.A.C. farm at Guelph, the soldiers' home at Whitby, and the industrial home at Kingston, besides being the choice of hundreds of Ontario's foremost farm-ers.

It will pay any person buying a silo to investigate this silo. Farmers' Silo Company, Markham, Ont.

MARKHAM.

FORDWICH.

George Newbery has sold his farm "Kinellar Lodge," part of lots 14 and 15, on the 9th concession of Markham, 125 acres, to Fred Bunker of Brougham, for \$13,000. Jas. Malcom, real estate agent, of this place, put thru the deal.

CLEAN AND NOISELESS MECHANICAL MILKING

In the model barn by the railway. north of the cattle sheds, will be found an extremely interesting display. It is that of the Hinman milker in operation by H. F. Bailey & Son of Galt, Ont. Here is to be seen a three-unit mechanical milker being operated by a one-quarter horsepower motor. Advocates of clean milk will be delighted with this grand labor-saving device. No metal air pipes are used with the Hinman milker, consequently no in-terchange of stable air is taking place. The whole operation of this milking machine is certainly simple, safe and

On entering the booth one is at once struck with the lack of noise and vipration, and one can easily understand thy the cows seem to like the machine and stand so quiet, chewing their and while the milking is taking place. The symplicity of operation of the Hinman milker extends to the cleaning of the instrument. All that there is to be kept clean can be carried in the one hand, and milk from the Hinman milker grades clean at the creamery

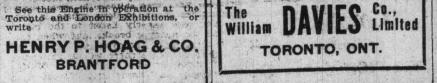

SAWYER-MASSEY TRACTORS.

West of the live stock building can be seen an exact duplicate in smaller size of the fanfous Sawyer-Massey tractor that won the gold medal at the last official contest held in Canada at Winnipeg in 1913.

This concern is the only large manufacturer of tractors in Canada. The ractor is built on sound engineering principles, and is the result of many years' experience in building tractors for both farm and road making uses. They are built in Canada by Canadian workmen and of mostly Canadian material.

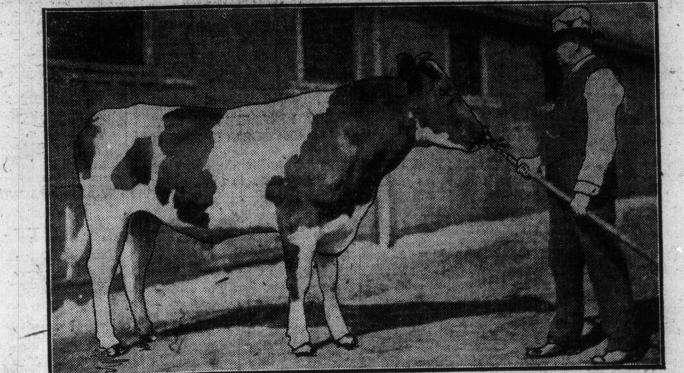

It is a matter of pride that we have in Canada a company which has had so many years of success in manufacturing tractors both for the Canadian people as well as doing an immense export trade with foreign countries. Sawyer-Massey Company are an old reliable Canadian manufacturing concern, and are always careful in their statements about their products. For instance, their tractors develop all the power they are expected to give; their rated horse-power is put at a conservative figure.

Any farmer interested in purchasing a tractor would do well to thoroly investigate the well-proved merits of the Sawyer-Massey tractor, and not be led astray by any wild cat scheme of a mushroom company. By all means visit the Sawyer-Massey booth and ask the demonstrators to explain the strength and smooth-running features of the Sawyer-Massey tractor,

The Greatest Holstein Bull in the Dominion of Canada

Now Owned by the Alberta Pure Bred Holstein Development Co., Ltd.

Albina Josie King, 25 months, the highest priced bull ever imported into the Dominion. His dam, Albina Josie, is one of the twenty-two cows in the world, why have produced 40 pounds of butter in 7 days. All of these 22 are Holsteins, and they are the only cows out of the 36,000,000 odd cows in North America, who have attained such a remarkable record. \$25,000 was paid for this rare animal, Albina Josie King, by his present Ganadian owners, the Alberta Pure Bred Holstein Development Company. Limited, of Calgary, Alberta. U. L. Appleford, president and general man-ager of the company, believes that this young bull will develop into the strain of the King of the Pontiacs in his blood. Mr. Appleford has been in Buffalo for about. Siness, led him to purchase Albina Josie King as the choice of the far-famed Cabana herd of Holsteins, and Mr. Appleford is certainly thoroly ex-famed Cabana herd of Holsteins, and Mr. Appleford is certainly thoroly ex-pand in fact was born on an Ontario farm. His father before him was in the Holstein breeding industry and started what is today the oldest cheese factory in the Dominion of Canada. It is located at Mapleton, Elgin County, outario.

Untario. Like thousands of other dairymen, Mr. U. L. Appleford realizes the marvelous possibilities in the development of pure bred Holstein cattle, and his company is formed for the purpose of acquiring a large herd of pure breds and of ultimately becoming the largest breeders of the Dominion of Canada

breds and of ultimately becoming the largest bredshift of the Canada. Mr. Appleford believes in the policy of owning, breeding and developing the very best blood in the workl, and in purchasing this world necord sire, the very best blood in the workl, and in purchasing this world necord sire. Albina Josie King, he is surely carrying out his belief and policy, as there is not a better bred sire in the world than Albina Josie King. Holsteins in Front. Holsteins have been coming rapidly to the front in recent years until by actual official records made under the supervision of the agricultural department of the various states and Canada, pure bred Holsteins have captured all world's records for both milk and butter production in all the

various classes and ages, so that the pure bred Holstein cow today stands superior over all competitors in the world. When it is considered that in North America there are about 150,000 head of cattle all told it will be appreciated that it will be many genera-tions before the demand can possibly be supplied and that high prices not only will be peid and that the present prices will not only be maintained; but they are sure to largely increase on account of unprecedented demand. Canada has been rapidly forging to the front in the development of Holstein cattle, many fine records having been made. Notwithstanding this Albina Josie King will be the greatest size ever imported in Canada and greater breeding and record development than any owned or developed in the Dominion. Under these conditions the great ranch of the Alberta Pure Bred Holstein Development Company is sure to lead all competitors in the for sits0,000, and for a short time only is offering to sell a few shares at for sits0,000, and for a short time only is offering to sell a few shares at of sits0,000, and for a should run easily 50 per cent. Amually. Any one interested and devices of making what we believe a first-class investment, should see Mr. U. L. Appleford, at cattle shed No. 21, Exclusive streater, should see Mr. U. L. Appleford, at cattle shed No. 21, Exclusive streater, or Mr. Geo. H. Anglin, care of Pearson Bros., 17 East-Adelaide street, Tor-or. Ont.

onto. Ont. The safety of your investment is not only in the pure blood in the stock, and the good care which is assured thru the competent management and experience of the president and general manager. Mr. Aspleford, but also in the location of the ranch in Calgary, Alberta, where tuberculosis in cattle is unknown, being 3000 feet above sea level. The ranch of 1771 acres. is just 20 miles north of Calgary and has been running for years under Mr. Appleford's direction, and has now been incorporated to do business on a larger scale. Besides Albina Josie King, the company will be shipping, at the close of the Exhibition, ten carloads of Ontario's finest Holstein cows to Alberta.
