FRIDAY MORNING SEPTEMBER 24 1920

New York, Sept. 23.—Rails and industrials pursued widely divergent courses in today's very active stock market, the former, especially low-priced issues, scoring additional gains, while the latter were more unsettled as signs of business readjustment multiplied.

That this readjustment is taking the form of pronounced price revision was war conditions.

That this readjustment is taking the form of pronounced price revision was clearly indicated by the news that two prominent western mail order houses had cut prices from 10 to 20 per cent., while the manufacturer of a well-known automobile announced a reduction of 17 to 21 per cent. for his product.

Accompanying these developments were rumors to the effect that the coming weeks are likely to witness a marked slowing down of operations in the steel trade, with probable reductions. The more severe losses of the session were again sustained by motors and affiliated specialties, oils, steels, equipments, shippings and some of the food shares, where gross declines extended from one to six points, with partial rallies on short covering at the close.

Greater stability on more diversified dealings was shown by the bond market, with Liberty issues as the outstanding feature of strength.

#### PRICES GO ONE WAY, AND THAT DOWNWARDS

The surplus of sugar now accumuating, as shown by the statistics sent

lots, and the absorptive power is consequently quite limited.

There is little necessity to individualize transactions. Prices were pretty much all the one way, and one cose was cited yesterday of a standard stock in which it was not possible to get a present price in order to effece a sale. It is to be noted, too, that many of the listed stocks are quoted without bids. Brazilian held well, but the sales were small, and none took place during the morning session. Steel Corporation also showed substance and advanced a point. Steel of Canada, on the other hand, was subjected to liqui-

### IMPROVEMENT NOTED IN MINING MARKET

The local mining market gave a bet out from Ottawa, is another indication sentiment on the exchange was certhat the days of profiteering are about tainly more hopeful. The bane of the gone. Together with this comes the precious metal industry for the past nnouncement from New York that a five years has been the very much large wholesale cotton firm had made a cut of 33 1-3 per cent. in prices. These incidents are not to the liking of bulls on the stock markets. It may be argued that the stock markets have discounted the change. New York has certainly done so to some extent, but the Canadian markets with some few exceptions are still carrying security prices at the inventories of the glorious days of a year ago.

The Toronto market yesterday had little semblance of life, but more stocks would have been disposed of had there been more buyers. The bargain hunter is in the market to some extent, but these orders are for small lots, and the absorptive power is consequently quite limited.

There is little necessity to individualize transactions. Prices were pretty

the silvers.

The market closed with a better undertone than it has for several weeks, and the surprise will be if much more buoyancy is not witnessed from now

#### Shareholders Responding To New Davidson Deal

ing the morning session. Steel Corporation also showed substance and
advanced a point. Steel of Canada, on
the other hand, was subjected to liquidation, and the support was lowered
to 56.

The investments made an improved
presentation, and Commerce and Royal
Bank were strong. The war bonds
were also in much better demand.
