"For They are Jolly Good Fellows." An official enquiry into the liquor traffic in Switzerland has been induced by petitions sent up from various cantons for legislation against such traffic. The petitions give statistics which show that the consumption of alcohol in Switzerland is greater per head than in any other country in Europe; also that the use of brandy among the Swiss is increasing, and that parallel with this there is an increase of mental diseases and of misery and want. Among the extraordinary statements it says: "The practice of social drinking of spirituous liquors brings a cheerful temper into society, effaces the traces of daily labor, opens the heart to other impressions, and is intimately associated with the development of public life. Plain and simple mechanics are not liable to get out of order. Complicated watches, intended not only to keep the time of day, but to make the movements of the moon and stars, are certain to need frequent repairs.
