## LETTERS FROM THE PEOPLE

**SUMMERFIELD.** April 7, 1904.

To the Editor of the Sun:

Sir—That this series of articles is based wholly upon the law of God, the denouement is surely evident to the great majority of your readers. Such being the case, anything connected with the ceremonial law of the Mosaic dispensation has no place in them. The ceremonial law broke existing because the moral law, or rule of God's government, had been broken. It stood as a great kindergarten system, teaching the people the duties of a Saviour to come, to redeem them from the penalty of the broken law. In Heb. 10:1 Paul speaks of the ceremonial law having a shadow of good things to come, etc. This law, with its ceremonial Sabbaths and currying on certain days of the month irrespective of the days of the week, expired by limitation.

What type met the great Antitype on the cross of Calvary, types forever ceased; and Paul, in speaking of it in Col. 2:14, 17, says: "The handwriting of the law, that was against us, which was the evidence of our guilt, he has taken out of the way, 'nailing it to his cross.'"

To the honest soul seeking for truth, there is no confusion between the two laws. The line of conduct will always clear itself if read with certain truths fixed firmly in the mind. For instance, 1 Cor. 7:19, "Circumcision is nothing, and uncircumcision is nothing, but the keeping of the commandment of God." This text is the key to the Book of Galatians. It simply means the outward observance of religious laws in forms and ceremonies, but surely it is clear that it is not worthy of us as a law of people.

One of the things we are assured of is that the law is not to be treated, which, I suppose, is understood to mean that they are not cut off or kicked around like dogs, which is the case with the law. It is almost as much emphasized that it is almost a claim to "virtue" just as though, because the day of ill-treatment is gone by, we should be satisfied to let it go. We will now examine the law, not as to what the patients ill-treated, but rather, do these unfortunate have the very best of things, and are they to be pitied? The question is not, are the patients ill-treated, but rather, do these unfortunate have the very best of things, and are they to be pitied? The question is not, are the patients ill-treated, but rather, do these unfortunate have the very best of things, and are they to be pitied?

Is this land so richly blessed and heaven-favored, with its happy, prosperous people doing the very best of things, and are they to be pitied? The question is not, are the patients ill-treated, but rather, do these unfortunate have the very best of things, and are they to be pitied? The question is not, are the patients ill-treated, but rather, do these unfortunate have the very best of things, and are they to be pitied?

Do not they deserve the very best that can be done for them, and can any country call itself Christian, and yet have a law which is not the law of God, or consistently seek blessings from Him who is "no respecter of persons," while they neglect this particular clause, the condition must apply to the human race, in the condition of no other class could be expected to.

Yet what are the facts? No one, not even the most sanguine supporter of the present management, nor, not even the management itself, pretends to claim that the country is doing its best for these unfortunate. It is not for anywhere near what might be done for them. Read the long list of "needs" in the recent report of the superintendent of the hospital, and you will see the supply of these needs would mean the patients. We know the physician in charge with his staff is doing the best he can under the circumstances, but with so many limitations, having in his work in so many ways, how can we expect the desired results? In some respects, at least, we are not doing any better for these poor fellows. If we are doing for our notorious convict gang at Dorchester. Our thieves and murderers, for instance, have open to them a large and costly library in addition to all the other humane privileges, but a few books and papers that charity may donate are all that ever reach the hands of the poor, unfortunate. Many of whom would enjoy a good book as much or more than any other pleasure.

It is a burning shame that the head of such an institution has to declare that the best cannot be done for these fellows, because the country will not furnish the means to do so, and I believe that the time is not far distant when the conscience of this land will be so aroused, and our government will be made to feel, with a vengeance, that their retrenchments will have to be practised in some other sphere, that will not lay our Christian country open to the grave charge of inhumanity, which we are now subject for I have no fear that any well thinking person will challenge my statement when
