

This view represents the new works built by the

## TORONTO LITHOGRAPHING CO.

at the corner of King and Bathurst Streets, Toronto, specially designed and arranged to suit the requirements of the business. With an entirely new plant, machinery and appliances of the very latest and most modern make, they can safely claim to have not only the largest, but the best equipped lithographic establishment in Canada and unsurpassed in the world.

# In the Summer Time

When you are not rushed with work in the printing office, is the best period of the year to renew your worn-out **Type and Printing Material**, and to **exchange your Presses whose capacity for fine and quick work are not adequate for your requirements.** In this connection I would ask you to write me and get my estimate for what you require, or, if you are not too far away, one of my travellers will have pleasure in calling upon you and giving you prices and terms for New Machinery, Type, or Material. There is no printers' supply house in Canada to-day that can give you the prices and terms that I can on Machinery and other Printers' Materials.

---

I SELL NEW TYPE AND MATERIAL AND NEW JOB PRESSES AND PAPER CUTTERS CHEAPER THAN ANY OTHER HOUSE
