BLOOD POISON

On account of its terrible effects, blood disease is called the king of all diseases. It may be either hereditary or contracted; so while it may not be a crime to have the disease, it is a crime to permit it to remain in the system. It may manifest itself in the form of Scrofula, Eczema, rheumatic pains, stiff or swollen joints, itching of the skin, eruptions or blotches, ulcers in the mouth or on the tongue, sore throat, falling out of hair, disordered stomach, and a general depression of the system. If you have any of these symptoms don't neglect yourself. You have the system. Beware of "old fogy" treatment—beware of mineral poisons—beware of Quacks and Fakes. **OUR NEW METHOD TREATMENT** is guaranteed to cure this disease, never to return. Bank Bonds will protect you. Our treatment is not injurious in any way, but reaches the very root of the disease and eliminates all poisons from the system. The symptoms of disease gradually disappear. The blood becomes pure and enriched, the whole system is cleansed and purified, and the patient feels prepared anew for the duties and pleasures of life. **GUARANTEED OR NO PAY. 25 Years in Detroit. \$20,000 Cured.**

THE AVERAGE BRAIN.

What It Weighs and the Number of Cells It Contains.

Whether it be the brain cell of a glowworm or one trembling with the harmonies of "Tristan and Isolde" the stuff it is made of is much the same. It is a difference of structure apparently rather than of material. And the chemical difference between a brain or nerve cell and that of the muscles or the skin seems reducible mainly to a difference in the proportion of two substances—water and phosphorus. Lean beef, for example, is from 70 to 80 per cent water; the brain is from 90 to 95 per cent water. And a brain or nerve cell may contain from five to ten times as much phosphorus as, let us say, the cells of the liver or the heart. The actual quantity is of course extremely small—by weight but a fraction of 1 per cent.

About three pounds avoirdupois of this very complex phosphorized stuff make up an average human brain. There is a lot more of it distributed down one's spinal column, and little plumes all over the body wherever a group of muscles are to be moved, and others still, the sensory or feeling nerves, which are everywhere. It is hard to find a cubical half inch outside the bones where they are not.

All told, the nervous substance, which for the sake of making its functions clear I have called the matter which thinks, forms a not inconsiderable portion of the body outside of the bony skeleton. It is made up of distinct and separated units, for the most part extremely minute, though some attain a length of two or three feet. These units, for lack of a more misleading name, are called cells. The "cells" which run from the small of your back down into your legs and wiggle the same or inform you when a member of the family is stubbed, are the longest. Those of the brain are mostly so small as to tax the powers of the microscope. Their average length would be measured in thousandths of an inch. There have been many attempts to get at their actual number. It is certainly large. Computations for the brain alone range from 600,000,000 upward. One, due, I think, to Waldeyer, sets the total number of brain cells (average) at 1,600,000,000. This would mean a brain population exceeding the known population of the earth.

FACTS ABOUT FOLKS.

Boys grow more regularly than girls. The memory which acts quickest acts best.

Urban life decreases stature from five years of age on.

Firstborn children exceed later born in stature and weight.

Children born in summer are taller than those born in winter.

Red and yellow are visible at greater distances than green and blue.

Truant boys are inferior in weight, height and chest girth to boys in general.

Dull children are lighter and precocious children heavier than the average child.

Great men, though often absentminded, have strong memories on the lines of their interests.

Healthy men ought to weigh an additional five pounds for every inch in height beyond sixty-one inches, at which height they ought to weigh 120 pounds.

Baldness Caused by Fear.

Several carefully observed cases of falling hair from emotion have been recorded, but the following is probably one of the most curious: A normally healthy farmer, thirty-eight years of age, saw his child thrown out of a cart and trampled upon by a mule. He supposed it killed and experienced in his fright and tension a sensation of chilliness and tension in the head and face. The child escaped with a few bruises, but the father's hair, beard and eyebrows commenced to drop out the next day, and by the end of the week he was entirely bald. A new growth of hair appeared in time, but much finer.—London Answers.

Curing a Snake Bite.

This is how the Indians of Central America cure a snake bite: They pin the unlucky patient to the ground and wind strong creepers above and below the bite until they cut into the flesh. Then they apply a live coal to the wound to cauterize it and follow that up by rubbing in a mixture of chewed tobacco and crushed garlic. By this time the victim is nearly mad with pain and ready to kill everybody in sight, especially when he finds, as he often does, that the snake was not venomous.

Pleased Him.

"I think we might give Bridget a dollar more a week," said the family man.

"What?" exclaimed his wife. "I set her to work cleaning the parlor today, and you should see the way she left it."

"I did. That's what influenced me. I noticed she fixed the piano with the keyboard close up against the wall."

A Literalist.

Wealthy Citizen—But I said distinctly in my advertisement that I wanted "a reliable colored coachman," and you are a red faced Irishman.

Applicant—But sure, sor, inn't red as reliable a color as black!

Dividing the Deck.

"Now, Johnny," said the teacher, who had been describing a war ship to the class, "how is the deck divided?"

"A deck is divided," replied the bright boy, "into spades, hearts, diamonds and clubs."

A STALLION FIGHT.

Battle Royal Between a Thoroughbred and a Wild Buckskin.

A contest between two stallions, one the leader of a wild band, the other a Kentucky thoroughbred that had run wild, is thus described by Sewell Ford in "Horses Nine."

Again the buckskin stallion charged, ears back, eyes gleaming, wickedly and snorting defiantly. This time the black stood his ground until the buckskin's teeth snapped savagely within a few inches of his throat. Just in time did he rear and swerve. Twice more—for the paddock raised black was slow to understand such behavior—the buckskin charged. Then the black was roused into aggressiveness.

There ensued such a battle as would have brought delight to the brute soul of a Nero. With fore feet and teeth the two stallions engaged, circling madly about on their hind legs, tearing up great clods of turf, biting and striking as opportunity offered. At last, by a quick, desperate rush, the buckskin caught the thoroughbred fairly by the throat. Here the affair would have ended had not the black stallion, rearing suddenly on his muscle ridged haunches and lifting his opponent's fore quarters clear of the ground, showered on his enemy such a rain of blows from his iron shod feet that the wild buckskin dropped to the ground, dazed and vanquished.

Standing over him, with all the fierce pride of a victorious gladiator showing in every curve of his glistening body, the black thoroughbred trumpeted out a stentorian call of defiance and command. The band that had watched the struggle from a discreet distance now came galloping in, whinnying in friendly fashion.

Black Eagle had won his first fight. He had won the leadership. By right of might he was now chief of this free company of plains rangers. It was for him to lead whither he chose, to pick the place and hour of grazing, the time for watering and his to guard his companions from all dangers.

As for the buckskin stallion, there remained for him the choice of humbly following the new leader or of limping off alone to try to raise a new band. Being a worthy descendant of the chargers which the men of Cortes rode so fearlessly into the wilds of the new world, he chose the latter course and, having regained his senses, galloped stiffly toward the north, his bruised head lowered in defeat.

Length of Life is Increasing.

The average length of human life is constantly and steadily increasing, having, according to a professor of hygiene, doubled within the past three centuries. In the sixteenth century it was between eighteen and twenty years, while today it is forty. The principal agencies in this prolongation of life, the scientist believes, are more attention to the air we breathe and more care as to the water we drink. This opinion is sustained by the statistics of large cities, which show that, owing to improved sanitation, the introduction of sewers and of public water supplies, their rates of mortality within the past forty years have been reduced to about one-half. Do you want to prolong your life and increase your powers? Then breathe deeply and drink plenty of pure water between, not at, meals—not iced water or boiled water, but distilled water.

The Tall Hat in France.

The tall hat, variously called "chimney pot," "stovepipe," "cylinder" and what not, became fashionable in Paris in 1790, soon after the death of Franklin, in whose honor it was known as "chapeau Franklin." In spite of numerous changes of style, it has maintained its ground ever since, unexpected as such a result would have seemed at its first introduction. For a time the style of hat was considered revolutionary in Germany and Russia. Any one wearing a "cylinder" was liable to punishment, but the evil reputation soon passed away, and the tall, stiff hat, the ugliest head covering that was ever worn and the most ridiculed, outlives all other styles.

Getting Acquainted.

"We hesitated about renting this place," said the woman who had just moved in, "until we learned that the families on both sides of us owned their houses. It is so unpleasant to live where the people next door are always changing and you never know what kind of neighbors you are going to have."

"Yes," responded the woman on the other side of the fence. "That's one reason why we're trying to sell our house."

The Picture.

Ethel—What do you think of this landscape, amy?

Aunt Hannah—Well—er—I don't think so much of the trees, but that grapevine is pretty good.

Ethel—Grapevine? Why, dear, that is the artist's signature.

The Spade and the Rake.

Cora—I think mother is altogether too outspoken in her criticism of my husband's actions.

Mildred—Yes; it's not always wise to call a spade a spade.

Cora—No, nor a rake a rake.

The Very Good Man.

"He's forever prating about what his conscience tells him. What does his conscience tell him, anyway?"

"It usually tells him apparently what awful sinners his neighbors are."

Though the world may owe every man a living, only the persistent collector gets it.

LOSS OF APPETITE

If your stomach is upset or in any way out of order—if food seems distasteful to you—if acidity, burning or fullness of the stomach prevents you from having an appetite—if you wish to eat and eat well—take, before each meal, a wine glassful of

VIN ST. MICHEL
(ST. MICHAEL'S WINE.)

It will create an appetite and restore to the palate that lost relishing taste for food. It will make the digestive organs act naturally and properly digest the food eaten, whether your stomach is in good order or not. No matter if you are young or old, sick or healthy

VIN ST. MICHEL MAKES YOU EAT

Magic of London.

All those who love life know something of the magic of a great city. Paris, Rome, St. Petersburg, London—these are the names to set the heart beating. Low though we profess to rate it in deference to cosmopolitan opinion, we have, all of us, a shame-faced pride in our grubby British capital. Yes, it is a glorious thing to be a cockney; there is no harmony like the roar of Piccadilly, no melody like the chimes of Big Ben. The Englishman returning from his travels alights at Victoria with a long sigh of contentment.—The Speaker.

CURED HIS BRIGHT'S DISEASE

Former President of Bricklayers' Union used Dodd's Kidney Pills

Andrew McCormick, of Toronto, Tells of a Cure for the most Dreaded of all Diseases.

Toronto, June 15.—(Special.)—In these days when the dreaded Bright's Disease seems to be selecting its victims at will the report of an authenticated cure is received with relief by all classes of the community. And such a report comes from Andrew McCormick, of 243 Spadina avenue, this city.

That Mr. McCormick is well known and highly respected, is evidenced by the fact that he has held offices in several fraternal societies, and was for several years President of the Bricklayers' Union. Interviewed regarding the cure, Mr. McCormick says:

"I suffered with an attack of Bright's Disease and naturally was much troubled concerning it. I heard of the wonderful cures effected by Dodd's Kidney Pills and concluded to try them. The result was so satisfactory that it gives me pleasure to recommend them."

Make and keep the Kidneys sound by using Dodd's Kidney Pills and there can be no Bright's Disease.

In Case of Poison.

When any one is accidentally poisoned and you are not sure of the antidote, give an emetic of some kind immediately. Mustard and salt are two things found in every household, but a bottle of ipecac costs little and is better than either and should always be kept in the house. If mustard is to be used, put a desertspoonful in a glass of lukewarm water and make the patient take two or three glasses; then by tickling the throat with the finger vomiting is certain. The dose should be repeated in about ten minutes, so that the stomach may be thoroughly emptied. No matter what the poison, remember, the thing you should do is to give an emetic.

Ragged clothes quickly—that's what common soaps with "premiums" cost; but

SUNLIGHT SOAP REDUCES EXPENSE

Ask for the Octagon Bar

Next in importance to freedom and justice is popular education, without which neither justice nor freedom can be permanently maintained.

Dear Sirs,—Within the past year I know of three fatty tumors on the head having been removed by the application of MINARD'S LINIMENT without any surgical operation and there is no indication of a return.

Clifton, N. B. CAPT. W. A. PITT.
Gondola Ferry.

The more a man studies himself the less fault he will find with his neighbor.

—You should not feel tired all the time—healthy people don't—you won't if you take Hood's Sarsaparilla for a while.

A man's knowledge is seen in his questions more than in his answers.
