**Liberal Dividends Make Low Life Premiums**

HOW IS IT that The Mutual Life of Canada can pay such splendid profits as it continues to do from year to year?

**A LOW EXPENSE RATIO.** A low expense ratio naturally favors the payment of large profits, and the ratio of expense to total income is a steadily decreasing quantity with The Mutual Life of Canada.

**A HIGH INTEREST RATE.** High interest earnings also favor the payment of liberal dividends to policyholders, and The Mutual has a steadily rising interest rate.

**"BUSINESS THAT STAYS."** The permanence of a company's business is a strong factor in the payment of profits, for lapses mean loss—but the Mutual is without a superior in the permanence of its business.

**SAFE INVESTMENTS.** Not only should investments be profitable, they should be safe, or what is gained on the one hand may be lost on the other. The Mutual has never yet lost a dollar of its invested funds. This is a record seldom equalled.

**FAVORABLE MORTALITY.** Should the mortality in any year fall below the losses expected by the table, there is, of course, a profit for the participating policyholder. The Mutual has had a favorable mortality ever since its foundation.

**"LASTLY."** Thus The Mutual Life of Canada has all those features in its experience that make for big surplus earnings, and this accounts for the Company paying the most Liberal Dividends, which mean the same as "the lowest possible policy premiums."
