**A TRIP TO CHICAGO.**  
**LOWEST RATES ON ALL RAILROADS.**

**LIFT YOUR CORNS  
OFF WITH FINGERS**

Tells How to Loosen a Tender Corn or Callus so it Lifts Out Without Pain.

A noted Cincinnati chemist discovered a new ether compound and called it Freezone, and it now can be had in tiny bottles as here shown for a few cents from any drug store.

You simply apply a few drops of Freezone upon a tender corn or painful callus, and instantly the soreness disappears, then shortly you will find the corn or callus so loose that you can just lift it off with the fingers.

No pain, not a bit of soreness, either when applying Freezone or afterwards, and it doesn't even irritate the skin.

Hard corns, soft corns, or corns between the toes, also toughened calluses, just shrivel up and lift off so easy. It is wonderful! Seems magical! It works like a charm! Your druggist has Freezone. Ask him!

**The One New  
Idea in Phonographs**

The "Organola" Model of our "Phonola" is the only really new idea—the only radical improvement—in phonographs in years.

Into this model we have built tone control pipes, carrying out the principle of the church organ. The tone result is remarkable and marks the "Phonola Organola" as the supreme achievement in phonograph construction.

The "Organola" cabinet is superbly finished. The winding crank is concealed. The motor is noiseless. It is an instrument of real distinction.

Other models of the "Phonola" from \$18 up. They play all makes of disc records.

Model Organola  
\$250
