The "Organola" Model of our "Phonola" is the only really new idea—the only radical improvement—in phonographs in years.

Into this model we have built tone control pipes, carrying out the principle of the church organ. The tone result is remarkable and marks the "Phonola Organola" as the supreme achievement in phonograph construction.

Model Organola
\$250

The "Organola" cabinet is superbly finished. The winding crank is concealed. The motor is noiseless. It is an instrument of real distinction.

Other models of the "Phonola" from \$18 up. They play all makes of disc records.

London Two-Day Sale of Shorthorns.

Before the passing of another week the 1918 spring sale of 150 high-class Shorthorns, selling under the auspices of the Western Ontario Consignment Sale Company, in the city of London, will have come and gone and April 2 and 3 counted as two eventful days in the history of Shorthorns in Canada. One hundred and fifty breeding Shorthorns of the calibre of those catalogued for London this spring are not often found in one sale-ring in any country and when sold under the liberal guarantee of this firmly established Club, our prophecy of one more successful sale, even at this very early date, should not be so very far out of order. A review of the pages of the catalogue just issued, in so far as good pedigrees go, will assure the prospective purchaser that a stronger aggregation of breeding Shorthorns was never before assembled in one consignment sale-ring in Canada. As individuals we also have every reason to believe that the quality of the cattle throughout are quite on a par with the breeding. The several consignments seen by our representative included cattle of considerably more show style and character than was usually seen in public sale rings of other years, and from these could be picked several individuals that would make promising material for the coming shows. In calling attention to a few of the better bred lots picked at random throughout the catalogue it is only fair to mention that not all of the better pedigrees are referred to, or that the best contained therein are even mentioned, but with both space and time

"I have been using your Royal Purple Poultry Specific for the past year and it pays for itself many times over in the extra production of eggs, and it makes my hens lay in the winter when the price of eggs is high."
