The Heart of a Range

BY its fire-box the usefulness, efficiency and durability of a range is measured—it is the heart of the range.

It must be scientifically proportioned to the whole range.

—It must be both heat-resisting and heat-conserving.

McClary's exclusive process semi-steel linings, fitted to expand and contract at different degrees of heat, has the tough durability that makes for long life under constant usage.

And the close-grained texture and toughened hardness of that semi-steel resists the permeating destructiveness of fuel gases.

Then the fire-box is built wide to give maximum utilization of the fire body and it is just the right depth to maintain a steady, dependable body of fire—under perfect control.

No part of the Pandora Range has been given such close study by its makers as the fire-box, because the fire-box is the most important and most difficult problem in building a perfect range.

"The Magic of the Pandora"—Booklet Free

This is only one of the many features of the Pandora Range described in "The Magic of the Pandora," a little booklet full of information that every woman will want before she buys a range. Write for it to the nearest McClary Branch.
