Even as a boy Willie Wilkins had been noted for his sliyness. It was he who at the school exercises always forgot his recitation in an excess of embarrassment and fled weeping from the platform. Now that he had exchanged the "Willie" for the more dignified "William," and appended D. D. S. to the Wilkins, he was still the same bashful person that he had been as a boy. Strong as was his love for Miss Kelton it did not overpower his shyness, and more than one promising lead to a proposal had been blocked through a sudden accession of nervous fear.

This very evening he had been on the point of a declaration of his love, and had slipped clumsily to his knees before her, when a smothered giggle had warned him of the presence in the room of Bobby Kelton, and by the time that tormenting youth had been ejected. Wilkins had lost his courage and his oportuhity. Wilkins turned into bed with the firm determination that he would know his fate on the morrow, but again his bedroom confidence vanished when he approached the house. Bobby, sitting on the plazza, saw him coming and elloped discreetly away, but Frances welcomed him with a smile and led the way to the pasior. There was much to like about Wilkins, and she felt only pity for his affliction.

For an hour they chatted disconnectedly on general topics, and then, summerining to his aid all his fortitude William medged closer to Frances chair.

Before he could think up an excuse, Bobby furnished a diversion by rolling out from behind the window curtains.
"I knew it," he shrieked in an ecctacy of glee. "I bet Tim Downing that he'd fluke. I've won his top and his glass aley and eight fish hooks.
Frances pounced upon the hoy before he could make good his escape, and while Wilkins regarded him malevolently, she shook the youngster until his teeth rattled.

"I don't know what to do with him," said Frances, dolefuly. "Father has whipped him repeatedly and we have even tried locking him in his room." "I suppose it's just boylshness," said Wilkins, trying not to show his chagrin. "I suppose it would be as well to let him go and say nothing about it.""

"Aw, let me stay," pleaded Bobby to his sister: "Il like to hear him talk. It won't help none to put me out. He wen't propose. He's scared to,"
Something in the boy's tone stung. Mrs. Kelton had spoiled her 'youngest in her leniest training, and Bobby had a quired a sharpness and a freedom of speech that were more than occasionalyy the cause of embarrassment to his sister. Never before had he been so frank in his speech, but it had its effect upon Wilkins.

"I am afraid you are going to lose those fish hooks and other things," said Wilkins, with quiet dignity, "for I am going to propose and since it is impossible to dispense with your presence, you may be a witness to the fact. FILTERING SOUND. For several years Professor J. G. For several years Professor J. G. McKendrick has been experimenting with the gramophone in order to eliminate the hissing and grating noises that interfere with the reproduction of musical notes. He speaks of his various processes as "accoustical filtration." The principal device consists of a number of narrow channels, communicating with each other, in passing through which the short, noise-producing waves are other, in passing through which the short, noise-producing waves are damped out, leaving the musical notes pure. By inserting dried peas and beans and fragments of corrugated zinc in a segment of the tube, the brilliancy of the transmitted sounds is great increased; and after hearing this filtered music the ear does not readily endure the "frying-oan noises of the naked gramophone."

The Street Preacher.

He stepped to the curb of the street And steod where a weary lamp Was struggling with fog and damp, Where the pulse of a city beat.

He threw down his cap on the walk, And then to a crowd such as comes From the tenements and slums Began an impassioned talk:

"Oh, why will you evermore grope In a darkness as black as pitch? Money makes no man rich And I offer you Christ and hope.

"If blind lead the blind it is sure The blind wil fall in the ditsh, For money makes no man rich Aud poverty, no man poor."

He was shabby, serene and wan, And the jeering crowd he faced Scoffed him and scatted in haste As the officer, said "Move on."

In the evident of self-content Of the crowd I could not share, For I was the only one there Who knew what the speaker meant.

If money makes no man rich.
If his Christ and hope be true,

LUTHER'S GREATEST SERVICE.

LUTHER'S GREATEST SERVICE.

"Luther's greatest service to the modern world," says Dr. McGiffert in the September Century chapters of his serial "Martin Luther and His work," lay in his recognition of the hormal human relationships as the true sphere for the development of the highest religious, as of the highest moral character. He performed an incalculable service in dignifying married life and ascribing to it a sacredness above the career of monk on nun. Instead of a temptation to a less perfect way of living, as woman was too commonly represented by the religious teachers of the middle ages, he saw in hr on ordaind of God to be the companion and helpmate of man, and in their union, not in their separation, he found the ideal life. Religion had been making too much of the number of

"I had swollen feet so hadly that at the state of the state adly that at times I could scarcly alk, my skin grew yellowish, and a eneral puffiness under the eyes gave my face a very unnatural appearance.
My strength failed, and as I am a working man, loss of time and the prospect
of serious illness caused me great anxiety. I read of several cures from Dr.
Hamilton's Dill. Hamilton's Pills and decided to get five boxes. Now I feel it my duty to testify they are the best kidney, liver and stomach medicine on earth. While my kidneys are so badly affected after all I think it was because the liver and kidneys are so badly affected after all 1 think it was because the liver and bowels were clogged up. Anyway, in less than a month the swelling in my feet ceased—my skin lost its yellowish cast —my eyes grew clear and natural, and considering my age is nearly sixty, I am as fit as most men. STEAM HEATED GARDENS

How Paris Market Gardeners Manu facture a Suitable Climate.

The market gardeners around Paris do not dream of waiting for spring before they raise spring vegetables. As one man put it, they move the climate of Monte Carlo to the suburbs of Paris.

This they do at enormous expense in money and in time. The gardens whenever possible are placed on land with a slope to the south and are well protected by walls on the north and east, walls built to reflect light as well as to give protection from the northeast winds.

The ground is practically covered with glass, not as in a greenhouse but by glass frames in the open, three light frames of uniform size, twelve feet by four and a half; and also by glass bells. These, too, are of a uniform size about the shape of a chapei bell, a little less than 17 inches in diameter and from 14 to 15 inches high. The French call them cloches. You may often see over a thou-sand frames and over ten thousand glass bells in one two acre plot in the sub-urbs of Paris.

A more recent innovation, according to Success, is the employment of hot wat-er pipes run under the soil, making of the earth a veritable steam heated ho-tel, with this essential difference, that the hotel keeper here is desperately eag-er not to keep his guests, but to per-suade them to leave on the earliest possible day.
