HE NEVER SPUKE AGAIN.

The Dog That Served the Purpose of a Ventriloquist The following story is told of a ventriloquist, now famous, but at the time of this happening so hard up he used to walk between the cities where he was to appear. On one of these tours he came to Philadelphia on foot, and on the road he picked up a miserable little dog "because it looked so much like he felt." The story will explain what became of the dog.

The first house he came to was a sa-

loon, and of course he wanted a drink. He had no money, but went in anyhow to see what he could do. The proprietor, a German, said:

"Well, what will you have?" He said, "I'll take a little whisky," and then, turning to the dog, he asked: "What will you have?"

The answer came very promptly: "I'll take a ham sandwich." The German was so surprised he almost fainted. He looked at the dog a moment and then asked:

"What did you say?" The deg replied: "I said a ham sandwich." Hans thought it wonderful that a dog should be able to talk and asked who had trained him, how long it had taken, etc., and wound up with: "How much you take for him?"

"Oh," said Mr. Ventriloquist, "I wouldn't sell him at any price, but I am a little hard up now, and if you will lend me \$50 I'll leave him with you till is More Nutritious and Appetiz-I bring back the money."
"All right," said Hans. "I just want him for a little while so I can show

him to some smart people I know around here." So everything was settled, the money paid, etc., and as the ventriloquist went out he turned and waved his hand to

the dog and said: "Well, goodby, Jack. I'll come back

The dog looked at him and said: "You mean son of a gun, to sell me for \$50 after all I've done for you! So help me Moses, I'll never speak another word as long as I live!" supply more nutrition, energy and strength for the day's work than a And he didn't.

## FLOWER AND TREE.

There is a pink variety of lily of the valley which is often grown in England, though seldom seen with us. A palm tree which grows on the banks of the Amazon has leaves thirty to fifty feet in length and ten to twelve

feet in breadth. Standard and "stand by" plants and varieties should be the rule of the beginner. Experiment with new flowers and varieties only in a small way. They would not dare enter the louse of prayer with unclean hands or feet or faces; hence when the muezzin's call is heard from the minaret five times a day faithful Moslems go first to the fountains that are found outside of every mosque and bathe themselves. There are innumerable bathhouses also in which genuine Turkish baths and massage are given.

At the same time their houses are positively filthy-too filthy, as a rule, for human beings to occupy-and the streets of Constantinople and every other Turkish town are indescribable in their nastiness. The clothing they wear is as dirty as their bodies are clean, and their food is often unfit for sanitary reasons.

Catarrh is a Germ Disease

Science, armed with the microscope, as established it a fact, and this corclusion renders obsolete the practice of treating Asthma, Catarrh and Bronchitis by stomach drugging, or sprays, snuffs, etc. Such treatments are an utter failure because they carnot penetrate the delicate air cells of the lungs, or permeate the air passages of the nose and bronchial tubes where the germs of Catarrh have where the germs of Catarrh have their stronghold. Catarrhozone is the only certain remedy. It is inhaled by the mouth and after spreading through all the respiratory organs is exhaled through the nostrils. Catarriozone kills the germs, heals the in-flamed tissues, clears the head and rope, which passed upward through throat in two minutes, and cures in a the space on one side of the shrine over few hours. The shrine in question was mounted upon two supporting and two driving wheels. rope, which passed upward through pulleys and was fastened to the ring of a ponderous lead weight, which rested upon a quantity of dry, fine sand. The escape of this sand through a small hole in the middle of the floor of the compartment containing it allowed the lead weight gradually to descend and by pulling upon the cord caused the shrine to move slowly forward in a straight line.

Heron describes the method of arranging and proportioning the wneels in case it was desired that the shrine move in a circular path. He also shows stantaneously. Nerviline's anody to how the shrine can be constructed to power is unique, for its composition move in a straight line at right angles to each other.

Officials of the patent office overlooked the device of Heron when they granted patents on slot machines, notwithstanding that previously Thomas Eubank, commissioner of patents in 1850, illustrated and described Heron's invention. The mechanism of the latter is almost identical with that in the modern device and simply serves as another proof of the saying, "There is nothing new under the sun."

STAGE LIFE TEN YEARS.

lew Crop of Minor Actors Harvested Every Decade. A new crop of stage people is harvested in the United States every ten years. Each decade marks the beginning of a new epoch in theatrical his-

tory. This fact does not apply so aptly to stars and stage people who dominate in the profession, for the life of these, so far as the public is concerned, is usually somewhat longer. But with the rank and file-those who never rise higher than the level of minor rolesten years is about the limit of endurance. After having served before the public for that length of time without doing anything sufficiently meritorious or novel to attract unusual attention the actor or actress, as a rule, passes away in so far as the profession is concerned, and a new crop is harvested among the many anxious recruits on the waiting list to fill the depleted

Men who dea! in the talents of stage people to the extent of reaping financial return from their labors are better qualified to "size up" the situation than others, and their experience peaches that few ordinary people of the theatrical profession remain longer than ten years in the business. They either achieve distinction-although this is the exception rather than the rule-or else drop into other lines after having been convinced by experience that the stage, so far as they are directly concerned, offers practically no opportunity for advancement. For this enson the rank and file of the profesflon is constantly changing, and the popular idea "once an actor always an actor" is easily disproved

A Foggy Story.

In London an American, boasting of he superiority of his country, was incrupted by an Englishman, who said: here's one thing in which this councy surpasses America. You never saw the other side of the Atlantic any fog that could match the one which hangs over London tonight."

"Fog! Fog!" came the unhesitating reply of the irate American. "Why, this is nothing compared with some of the fogs we have around New York harbor. Sometimes the fog is so thick around there that it's a common thing for the captains of the ferryboats to put on extra crews simply to pump the fog out of the cabins. Why, there's a corporation organizing in New Jersey right now to can American fog and supply the British people with 'the real thing." "-Argonaut.

Natural to Him.

"Your husband." said Mrs. Oldcastle as she again availed herself of the privilege of inspecting the splendid library of the new neighbors, "seems to have a particularly fine taste for articles of vertu."
