HAMILTON CANADA TUESDAY MAY 1, 1906.

30 CENTS A MONTH.

EXCITEMENT IN PARIS; MILITARY IN CONTROL.

Sixty Thousand Troops, Twelve Thousand Police and Others Keep Guard.

Thousands of Arrests Made, Including Many Anarchists and Labor Men.

Striking Printers Sing Revolutionary Songs and Attack the Police.

Paris, May 1.—May 1st, the day for which the government made prodigious preparations, finds many quarters of the city presenting the appearance of an armed camp.

The forces concentrated under Prefect of Police Lepine are estimated at 50,000 troops, 12,000 police and 8,000 Republican guards, gendarmes and detectives. Detachments of troops of all arms took up positions in the main centres at an early hour. The bulk of the military forces had been strictly confined to the barracks since midnight, and remained under orders to be ready to move at a moment's notice. The troops at mid-night began to guard the public sources of water, gas and electric supply.

The plan of the authorities was to avoid the use of the military, unless such a step was imperative, to maintain order.

Accordingly the aspect of the city during the early hours was little different from usual, but toward noon the military activity increased. The metropolitan railroad and the omnibuses continued to operate, but cab traffic was crippled owing to the cabmen's fears. The extensive central markets were deserted, the country folk refusing to risk the bringing in of provisions. The suburbs, which are guarded by troops, were reported to be calm.

Strong bodies of troops are posted at the main railroad depots in the city. The St. Lazarus station is surrounded by a squadron of cuirassiers, several companies of infantry, and Republican guards. Prior to the opening of the Bourse, a regiment of infantry took up a position on the terrace, a detachment of cuirassiers occupied the neighboring terrace. The Bourse opened at the usual hour, but business was restricted.

Anarchists Expelled. Paris, May 1.—225 p. m.—Many Anarchists have been expelled from Paris, including Stephane, Guertzeoff and one woman.

M. Lassy, Secretary of the Confederation of Labor, and M. Fromentane, the wealthy Anarchist, have been arrested. Delegates from all the trades are assembling at the labor headquarters.

More Arrests Made. Paris, May 1.—3 p. m.—The Place de la Republique is the scene of continuous arrests. The number of disorderly persons has increased by several thousand.

'FRISCO DEATH LIST IS UNDER ESTIMATED.

At Least 2000 Lives Lost, Says Mr. Holton, Now in This City.

The loss of life in the great earthquake disaster has been greatly underestimated in the official reports, according to Mr. Edward Holton, a prominent resident of San Francisco and a former Hamiltonian who is here on a visit. In an interview this morning Mr. Holton said that although the official figures will never be known, he was confident that over 2,000 lives had been sacrificed in the awful calamity.

With his wife, Mr. Holton arrived here yesterday afternoon, and is visiting at the residence of his mother, Mrs. Warren Holton, Main street east. He spent four days in and near San Francisco during the earthquake and the great fire that wiped the city out, and was able this morning to give the Times a vivid description of the destruction of the queen city of the Pacific slope.

"I was staying at the Manhattan Hotel with my wife when we were awakened about 5 o'clock in the morning by the trembling of the earth," said Mr. Holton. "The Manhattan is about two blocks from the City Hall, and right in the line of the partition of the city which suffered most from the heavy shock. It is impossible to describe the terrible feeling, and although the official record showed the shock only lasted 56 seconds, it seemed like a lifetime. With scores of other people we rushed out of the building and ran a short distance to an open sand lot. People were scantily attired and greatly excited. The awfulness of the scene seemed to prevent people from crying out, and while you could hear moans of pain from the injured there was nothing like the outcry to be expected with such an appalling disaster.

"We remained in the lot for considerable time, until the excitement kind of died down, and then the proprietor came out, told us breakfast was ready, and that all danger was past. I felt a pain in my arm, and when I returned to my room I found that a large picture hanging near my bed had been shaken down and struck my arm. I did not notice it in the excitement at first.

"About 8 o'clock there was another heavy shock that alarmed the people although it was not to be compared with the first tremor. All during that day and the following days and nights there were several slight shocks.

"We spent a good deal of the day

Fresh Off the Wires

Rev. M. W. Holland, pastor of St. Patrick's Roman Catholic Church at Port Henry, N. Y., died in that place last night.

Many shippers and clerks on the Shamokin division of the Philadelphia and Reading Railroad, were suspended to-day until the collieries resume.

At midnight last night all the members of the Longshoremen's Union at South Chicago, numbering about 3,000, quit the work of loading and unloading vessels.

May day was marked by numerous minor labor strikers in New England. The majority of the difficulties were confined to the building trades. In Boston while there was no general disturbance, several small strikes occurred.

The Tribune says: The belief that affairs are shaping themselves for an official strike of anthracite miners caused an increased demand for the small steam sizes of anthracite here yesterday, and an upward tendency in prices.

A Catholic priest, a Jewish Rabbi and representatives of six Protestant denominations united at a meeting last night in New York to plead for a more thorough religious education of children. The movement had its inception at the inter-church conference last fall.

Following the recent investigation by the Interstate Commerce Commission into the relations existing between coal carrying railroads and mining companies on their lines, it is announced that the Baltimore and Ohio railroad has disposed of its holdings of stock of the Consolidated Coal Co.

Sailors Shot in Fight

Havana, May 1.—Louis Schmidt, a sailor from New Ark, N. J., was seriously wounded by a pistol shot, and another sailor was slightly wounded, Sunday evening, at Guantanamo in a row between sailors from American warships and Cuban police. Thirty sailors, who went ashore on a lark, attempted to lower the flag over the Spanish club. The police intervened, and citizens joined in the disturbance. Several shots were fired from guns and revolvers.

One policeman is reported to have been seriously wounded. Several of the sailors were arrested.

F. G. BROUGH DYING.

DOCTORS WITH HIM ALL DAY—NO HOPE OF RECOVERY.

London, April 30.—Doctors give no hope of the recovery of Mr. T. G. Brough, manager of the Dominion Bank. They have been with him all day.

New Delivery System.

Stanley Mills & Co. with their characteristic up-to-dateness, have to-day put into operation in the streets an entirely new outfit of modern delivery wagons, harnesses and uniforms for their drivers. These splendid wagons were made by Hamilton by J. D. Patterson & Co., Park street north, and reflect great credit on the builders. All are painted alike and have heavy rubber tires. The gears are white, red striped, bodies dark blue, tops black with red wire guards. A combination of colors strikingly handsome in effect.

The company complains (and with good grounds) of the condition of the city streets, especially in the newer districts, but it expects to partly overcome these conditions by the use of rubber tires. It is found by experience in other cities that the wear and tear of the wagons and horses and the breakage of goods in transit is reduced to a minimum by the use of rubber tires, although the initial expense is considerably in excess of steel tires.

The Double Breasted Sack.

A model much affected by sturdy, brave men because it sets off the distinction with strong emphasis, yet it can be worn by the man to whom nature has been less generous, for the tailor has put a life into its proportions and a breadth into its shoulders and chest that are in turn shrouded upon its wear. The lines of the coat follow the form slightly, the lapels being broad and skillfully proportioned, give much of the tone and strength which make the style popular. Prices, \$8 and upwards—Frick & Co., 13 and 15 James street north.

The King Fell

Naples, May 1.—The fact that King Edward had a slight fall on the stairs on the royal yacht Victoria and Albert yesterday, he fell through a bull's eye in the compartment his companions saw him in his plight, but for a long time were unable to help him.

HAMILTON BILL.

H. W. & G. RAILWAY BILL LAID OVER.

Ottawa, May 1.—(Special).—Mr. Zimmerman, M. P., explained at the Railway Committee meeting the bill to incorporate the Hamilton, Waterloo and Guelph Railway Company. He said it was to run from Hamilton to Elmira, passing through Galt, Preston, Berlin, Waterloo, also from Hamilton to Elora, and Fergus passing through Guelph. It was an electric road.

Mr. R. G. Code, Ottawa, for the Ontario Government, opposed it because it should come under the local Government jurisdiction.

SHERRING WON THE BIG RACE

(See Also Page 7)

The first news of Sherring's success was received by the Times shortly before 1 o'clock, and was at once bulletined. The good news spread rapidly. The victory of Sherring is one that Hamilton can proudly celebrate. In fact it is one for rejoicing throughout Canada, being the greatest event in the athletic world. The pick of the world's runners were sent to Athens to try to win the coveted prize. The United States runners had trainers and attendants, and everything possible was done for them. Sherring was alone and unattended, and therefore his victory is all the greater. The welcome tendered him when he arrives home should rival or equal any reception ever given in this city to an athlete.

The flag on the fire stations and the City Hall were hoisted this afternoon in honor of Sherring's victory in the Marathon race.

WILLIAM WRIGHT MAIN.

Mr. Will. W. Main, who was last evening appointed Assistant City Treasurer, is a native of Hamilton, having been born here on May 25, 1861. He was educated at the old Central school, and entered into business with his father when but a young man. For some years he has carried on the rope business of A. Main & Son. At the municipal elections in 1903 he was first elected alderman, being third in the standing, and at the 1905 and 1906 elections he stood first. He is a man of large business ability, a high sense of honor and undoubted integrity, and his many friends predict for him a successful career in the city's service. That the city will be well served by him no one doubts. He enters upon his new duties on June 1.

TO CONFER ABOUT LOCAL SANTARIUM.

Provincial Officers and Dr. Parfitt to be Here Next Week.

An important conference is to take place in this city next Monday in reference to the Hamilton Sanitarium for Consumptives. Dr. Hodgins, Provincial Health Officer, W. Bruce Smith, Provincial Inspector and Dr. Parfitt, Medical Superintendent in charge of the free sanitarium at Gravenhurst, have been invited to come here to meet the directors of the Hamilton Health Association, and a meeting has been called for 5 o'clock in the afternoon. The architect will also be present. The object of the meeting is to discuss plans and get the advice of those well qualified to speak upon the subject. Among the local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep as much of the available funds as possible for that purpose, while doing local people, very naturally, there is difference of opinion as to how far the Association should go in the matter of expenditure for permanent buildings. The great problem of maintenance is one that requires careful thought and the desire is to keep
