Reports still continue to come in from various sections stating that partridge are almost extinct in certain places where three years ago they were plentiful.

As a general rule hunters from the United States the past season had remarkably good luck. One party of four got their full quota of deer and two fine bull moose.

A white doe was shot in the Halipurton district during the first week of the opening season and was seld by the lucky hunter at a big price to a gentleman in Quebec, who intends to have it mounted for his private museum.

The number of bear shot this November was very much greater than in any previous year that we have any record of. About twenty-cight carcasses are known to have been brought to Toronto alone, and many others were taken east from the northern section of Hastings and Peterboro counties.

### Must Bring Capacity. (Montreal Star.)

mediate cause.

Canada has reached a stage in its development where it must require of every newcomer that he be able to make his own living. We must not attempt to swallow and digest the human "failures" that have become a burden in their home lands. It will always be a cheap method of charity for a community to pay the passage of its industrially ailing to another land if thereby it can get wholly rid of them. We could do some shipping under such a system ourselves; and we are by no means so hampered by the deadwood of humanity as the land across the sea. For the immigrant who brings with him industry and capacity, we have an abundance of room. But he must be a man who can make his living, even if his particular trade happens to be overcrowded.
