

HON. OLIVER MOWAT.

Speech at Almonte—The Reform Leadership—Tri-Partite to Mr. Blake.

The following is a synopsis of the speech of the Ontario premier at Almonte last week. It will be seen that he pays a high eulogy to the Hon. E. Blake, the Leader of the Liberal party in the Commons:

PREMIER MOWAT'S SPEECH.

The chairman in introducing premier Mowat as the next speaker said that that gentleman had rendered invaluable services to the people of this eastern district of Ontario. The provincial premier had that day seen the famous Mississippi river so famous in litigation which Sir John Macdonald told the Toronto workmen was a stream so small that the farmers scarcely water their cattle in it during the summer time. (Laughter.) Mr. Mowat, who was received with hearty cheers, after a passing tribute to Sir Richard Cartwright's speech, said he had taken a deep interest in the welfare of this eastern section of the province, because he had passed twenty two years of his life in Eastern Ontario. He then entered into a general review of the legislative history of this province, making one of the most happy speeches he ever delivered in his life. The history of the Saunders Macdonald administration and its overthrow by Mr. Blake was alluded to and the speaker said that all the credit for that feat belonged to Mr. Blake, for he (Mr. Mowat) had simply held the fort which that statesman had placed in his hands. Mr. Mackenzie was largely Liberal vivy, and this reference gave him the opportunity of paying a high tribute to the member for East York. He said that when Mr. Mackenzie was in office, there was no abuse too vile for the Tory press to hurl at him; but since his illness and retirement from active political leadership, there was no flattery too hypocritical. Mr. Mackenzie valued the latter quite as much as he was undervalued by their old time abuse. (Laughter.) No man they papers want the Liberals to throw Mr. Blake over as leader, but they were not going to take advice upon that matter from their political opponents. (Applause.)

MR. BLAKE WAS THERE LEADER

not because he thrust himself in his present position but because the Liberal party in parliament thrust the honor upon him. (Cheers.) They had every confidence in him, in his ability, in his statesmanship; and they were going to retain him in that position despite the Tory advice otherwise. Long may Mr. Blake be spared to lead the Liberal party of Canada (cheers) and then referred to his leaving the bench and re-entering political life; and read extract after extract from the Tory press during the past twelve or thirteen years, in which they expressed their horror at his course. These extracts (which were read amidst the cheers and laughter) showed in the light of the past few days' experience, that the objections taken for so long a period were not quite as well founded in conviction as they appeared to have been. The character of the provincial legislation was needed; but no radical constitutional change would be believed in favor with the people at the present time. It was a change in the personal and policy of the administration at Ottawa which was required. The present relations of Canada to the Mother Land are such that we rejoice that Canada commands all the freedom she does today and still retains British connection. Despite this, however, it was obvious to every person who had thought upon the matter that Canada's relations with Great Britain could not forever continue in their present form. A scheme of

IMPERIAL FEDERATION

had been discussed, but no scheme had been proposed which would receive popular acceptance on this side of the Atlantic. We are proud to form a part of the greatest nation the world has ever seen; great in her expansion of area; great in her millions of population, great in her traditions and aspirations, great in her past achievements and in her modern influence, great in war and the sciences and arts of peace, and great in all the varied resources of her vast territories. (Cheers.) We have felt pride that this nation was our nation; that we have a right to claim a participation in the glory surrounding her past greatness as well as present grandeur. But it was evident that our relations could not continue in their existing form; and that constitutional changes in those relations were demanded; but no one could now say what direct in those changes would take. He then referred to Mr. Meredith's efforts to make the public believe that the Conservatives favored more liberal measures than the Liberals themselves; and their parading as the advocates of manhood suffrage—against their own convictions—could not deceive anyone as to their real views. In conclusion he explained the reasons for the government paying a portion of the costs in the McLaren Caldwell appeal. The case was a public one—it was therefore for the province to fight Mr. Caldwell's case as it involved the principle of provincial rights at stake than to start a new case; and besides the amount granted was less than one half the real costs. If the government erred, it erred in giving too little rather than too much assistance. (Cheers)

McGregor & Parke.

of Hamilton, Ont., are the manufacturers of the greatest healing and purifying known for Sore, Burns, Burns, Cuts, Scalds, Salt Rheum, Frost Bites, etc. It is called McGregor & Parke's Carbolic Ointment. Be sure and get the genuine McGregor & Parke's Carbolic Ointment sold by G. Rhyms, at 25c a box 1m

GODERICH W. C. T. U.

Annual Report of the Women's Christian Temperance Union.

September 24th, 1885.

The annual meeting of the W. C. T. U. was held at the usual time and place. Officers present, president, county president, vice-president. Total number of members present 10. The meeting opened with singing and prayer by Mrs. McKennie, reading and prayer by Mrs. Gibson. The election of officers was then proceeded with.

Moved by Mrs. Campbell, seconded by Mrs. Stokes, and carried unanimously, that Mrs. Capt. Gibson be re-elected president for the ensuing year. Mrs. Gibson in a few appropriate words thanked the ladies for the best conference and said she would be faithful in attending to the duties of the office.

Moved by Mrs. McKennie, seconded by Mrs. Nafzel, and carried, that the vice president, Mrs. Campbell and Mrs. Cattle be re-elected.

Moved by Mrs. Brown, seconded by Mrs. Leach, and carried that Miss Truman be secretary.

Moved by Mrs. Leach, seconded by Mrs. Nafzel, and carried, that Mrs. Pollock be corresponding secretary.

Moved by Mrs. Brown, seconded by Mrs. Cattle, and carried, that Mrs. Nafzel be treasurer.

The constitution was then read and an invitation given to those present to join the society.

Moved by Mrs. Leach, seconded by Mrs. Campbell, that the sum of \$4.00 be sent to the Pro. union as our affiliation fee. Carried.

The work of appointing delegates to the convention was then brought forward. Mrs. Leach stated that she intended to be at the convention. After some talk this work was deferred till the next meeting.

The subject of unfermented grape wine for communion services was introduced. A specimen was placed upon the table. It was a year old and perfectly good and fresh, being the pure juice of the grape, expressed and preserved in self-sealers. A statement was made contrasting the homemade and the purchased wine, as to cost, and showing that the former comes at about one-tenth the cost of the latter. The union would strongly recommend all the churches to adopt the method of making unfermented wine for sacramental purposes.

COUNTY CLIPPINGS.

Items from all Parts of Huron got on the News Exchange.

WHISKY CASES.—We understand that Constable Davis, of Blyth, who has been appointed public prosecutor by the Scott Act Association of this county, had several cases before Mayor Forrester, of Clinton, for violations of the Act, on Wednesday last. The first was a case against Spooner, of Clinton, dismissed; second, Wm. Kyle, Tuckersmith, withdrawn, and two cases against H. Shaffer, Kippen, dismissed, as the witnesses failed to appear. This rather discouraging beginning, whatever the end may be. It is gratifying, however, that some action is being taken to enforce the law.

STILL ANOTHER.—Another Huron pioneer, in the person of Mr. Wm. Scott, of this 7th con., of Tuckersmith, has passed his long home. Mr. Scott died on Sunday evening last at the good age of 86 years and three months. He had been troubled for some time with an internal tumor, but had always been able to around until Friday last, when he was forced to take to bed, and only survived until Sunday evening. He was a native of Dumfriesshire, Scotland, and came to Canada in 1832. He then settled in Galt, in the county of Waterloo, and remained there until 1846, when he removed to Tuckersmith and took up the farm on which he continued to reside until his death. He was among the first settlers in that part of the township, and was noted for his industry and good management, and had accumulated a competency. He was a man of few words and retiring disposition, but was thoroughly upright and honorable in all his dealings. His word was as good as his bond. In his prime he was noted for his muscular power, and in the early days of his settlement here he used to think nothing of carrying a hundred pounds of flour on his shoulder over the bush path from Egmondville to his home. He was an obliging neighbor and a good citizen, and in politics was an unflinching Liberal. He was always a great reader, and in later years his books and papers were his principal companions. His wife died about three years ago, and a son and daughter preceded him to the grave. Two sons and one daughter survive him. The funeral took place on Tuesday, and the remains were interred in Egmondville cemetery in the presence of a large concourse of sympathizing mourners. —[Expositor.]

A Certain Result.

The Bowels, the Liver or the Kidneys the result of taking Burdock Blood Bitters is certain to afford prompt benefit to the sufferer. Burdock Blood Bitters cure when other remedies fail. 2

A True Temperance Man.

Mr. John L. Sullivan is credited with denying that he was ever drunk. He says: "I drink, of course—every gentleman does that—but I never was drunk." It is to be regretted that Mister Sullivan did not give a full list of the accomplishments of a gentleman. In order to be a gentleman, it is necessary that a man should blacken the eyes of a restaurant waiter girl.—[London Advertiser.]

Hamilton Happenings.

There is now being manufactured here an article for instantly removing pain of any acute external nature, and it is certainly the most perfect cure for Neuralgia, Headache, Toothache and the like that has ever been tried. It is called Fluid Lightning from the rapid manner in which it acts, and is manufactured by McGregor & Parke. Sold in Goderich by G. Rhyms, druggist. 1m

A Good Word For The Salvation Army.

As times go, the Salvation Army is not a popular body, and there is nothing to be made by writing it up, but the fact is never to be denied that it is a good word in the mouths of the early Christians, that it is a word to primitive Christianity, and that it is a word to the methods of the Great Master, who went into the high seas and by ways, and called sinners to repentance. It is a word to point the finger of scorn and elevate the lip of derision at the expense of a realisation of the humble army. The man who scoffs, who passes by, at the lowly ones who go enthusiastic over their work of redeeming the fallen, softening the hardened, touching the conscience of the seared, and bringing to a realization of the better, nobler, and higher ways of honest thoughts, Christ-like actions and primitive purity knows nothing of the Christianity which he professes, or of the divine command by which the disciples were sent into all the world to preach the gospel to every creature. He may own a front pew, he may contribute largely to the support of his church, and he may even pass among his fellow as one of the strictest sect of the Pharisees, but for all that he is not a true, a worthy, or an estimable follower of the meek and lowly Jesus if his sympathies do not go out toward those who are willing to stoop down into the gutter in order to teach the grand truth of the Master, which were designed to elevate the lowly, exalt the humble, and bring all to himself. We speak not to total unbelievers, if any such there be. It is their right to ignore these things. But with professing Christians of all denominations, it is a most important matter. They cannot blow hot and blow cold at one and the same time. They cannot claim to be followers of the meek and lowly Jesus and yet pour contempt upon those who imitate his example by going into the slums to carry the glad tidings which He taught to the crowd on the shores of the sea of Galilee. The truth is, the salvationists are doing a good work in this and many lands. They are reaching those whom the churches do not reach. They are strengthening the one weak point in the church organization of these times. They are going to those who are without the pale. They are copying the methods of Christ himself, and the work they are doing is not to be despised. Wealthy men cannot do better than help them along. It is cheaper, as well as better and nobler, to convert a man than to leave him in criminal sinfulness to prey upon society. The highest church dignities in England have recently paid glowing tributes to the good work the Salvation Army is accomplishing.

The Idea Fell Through.

Mr. and Mrs. Defoe were at home the other evening. There had been a long period of silence, when suddenly Mr. Defoe exclaimed: "By gum!" "By what?" she responded. "By what it is dear?" he responded. "Say, we've got tired of playing games and what do you say to private theatricals? We'll get three or four of the best comedies and have regular plays."

"That will be splendid," she gasped. "Hanged if it won't! Twenty dollars will get us all the scenery we want, and each one can furnish his own wardrobe. As long as we've got the idea now, let's see how the characters run. There is Count Dumdorff, who is in love with Geraldine the fair."

"I'll be the Count, of course, as he is the hero. He kills four men, rescues Geraldine from a perilous danger, and he will be a good deal of kissing and love-making and a happy marriage."

"You! Oh, you couldn't play that part. She must be young and vivacious. I think I'll cast you for Hannah, who keeps a bakery in the park in Paris."

"I'd like to see myself playing Hannah in a bakery, I would," she defiantly answered. "If you can play Dumdorff I can play Geraldine."

"Oh, no, no, my love, you are a little stiff in the knees, and how you'd look throwing yourself into my arms as the villainous pursuer. I shall cast that little widow D. for Geraldine."

"Then there shall be two Geraldines of us. If you can play Dumdorff for your lame back and cataract I know I can play Geraldine with this little lameness in my knees."

"Now you listen to reason, Mrs. Defoe. You aren't built for a Geraldine, you are too fat, and your feet are too large; you haven't got the voice for it."

"And you'd make a pretty Count Dumdorff, you would," she fired back. "You want to get that crook out of your back, that bald head shingled over, your mouth repaired, and your eyes touched up with a paint brush! I think I see you killing four villains—ha—ha!"

"Woman, do not anger me!" he said in a deep-toned voice, as he rose up. "And don't you anger your Geraldine, either!"

"Geraldine! Why you don't know a sky border from a flat."

"Dumdorff! And you don't know a sky-border from a big fiddle in the orchestra."

"Well, well, well, we have no playing here."

"Then you needn't. When I play Hannah in a bakery to let you lug and kiss the widow D. or any other person all over the stage, you'll be three or four Count Dumdorffs."

"I'll bury you, my love, ja'ous woman."

"If you don't, I will, van man."

"Then they sat down, and the disturbed cat went back to her rug and to her dreams."

A Sad Case.

The poor victim of Chronic Dyspepsia apparently suffers all the ill of life, living in continual torture. Regulate the Liver and the Bowels and tone the Stomach with Burdock Blood Bitters and the dyspeptic's trouble is soon gone. 2

The Scott Act.

The question of how the Scott Act works in Oxford seems to be agitating the minds of a large number of people, both inside and outside the county. For ourselves, we think it too early to speak dogmatically upon the subject. The Act has not been in force long enough, or under the necessary conditions, to give it a fair trial. In this, as in so many cases, the truth seems to lie between two extremes. Friend Morrow, for instance, is a wofully wofully of the mark if he supposes that the Act has been reduced to one-twentieth of what it was. On the other hand, the article quoted from the West contains some mis-statement and inaccuracies obvious to all our readers. Speakers at the Prohibition Convention agreed that in many counties the Act had been only a partial success, and gave very sensible reasons for this fact. These apply to Oxford as well as to other places. Up to date we believe the situation to be about as follows:—For the first week or two after the Act came in force there was little or no liquor sold in the bars, but there was a large amount of private drinking—unusual supplies having been laid up in by unusual numbers of people. Then the bar business seemed to break out and flourish with little fear of the law. But the lively prosecutions that began in August made the business a great deal and made hotel men very cautious. Bar-room drinking has since greatly decreased. Very many who formerly dropped into hotels for a "social glass" are never seen there now. The treating system among "moderate drinkers" and young men is largely done away with. We do not believe that the aggregate of private drinking—that is, drunk not done by the poor—has increased. In spite of the large supplies sold in April, the reverse is probably the case. Still drunken men are not an uncommon sight on the streets. A score of them could be seen a circus day. As to general business, it does not seem to have been affected by the Act. We know that level-headed, unprejudiced men—whose opinions are usually correct—differ widely upon this perplexing question, even as to the most obvious facts; and many such could not agree with us. One thing is certain; no good can come of creating wrong impressions about the Scott Act. Like every other law, it should be enforced by the proper officers and acquiesced in by all. Its enforcement depends chiefly upon the sincerity and activity of those who carry it. When it has had a longer trial we will be able to judge more accurately of the results. We will then give the public the *Sentinel's* review of the opinion and the opinions as to the position of the province in regard to the country.—[Woodstock Sentinel-Review.]

The Most Delightful

Rev. Wm. P. Corbett, the great revivalist and chairman of the Methodist church extension, says Giles' Liniment Iodide Ammonia is the best remedy ever put before the public for neuralgia. He suffered for 32 years, and never, until he applied this remedy, did he get any relief; and takes pleasure in thus publicly announcing his cure, he desires to be a benefactor to the human family. Sold by F. Jordan, Goderich.

Beer Against Whiskey.

For some years a decided inclination has been apparent all over the country to give up the use of whiskey and other strong alcohols, using as a substitute beer and other compounds. This is evident from the fact that the use of beer is found to be not only less injurious, but also a large amount of nutriment; also that bitters may have some medicinal quality which will neutralize the alcohol which it contains. These theories are without confirmation in the observation of physicians. The use of beer is found to produce a species of degeneration, fatty deposits, diminished circulation, condition of congestion and perversion of functional activities, local inflammations of the liver and kidneys are constantly present. The use of beer is found to be not only less injurious, but also a large amount of nutriment; also that bitters may have some medicinal quality which will neutralize the alcohol which it contains. These theories are without confirmation in the observation of physicians.
