An excellent step has been taken in many American cities to save children" from becoming delinquents." Towards this end there has been created by "mothers" many bureaus whose object is to lend a helping hand to boys and girls before they commit acts which would call them to appear before police and juvenile courts.

PROTESTANT COMMISSIONERS COMPLAIN OF MEDICAL IN-

SPECTION. After medical inspection of the Protestant schools by the city was characterized as a joke by the School Board at their meeting lately, it was decided to refer the whole matter to a special committee in order that ways and means may be found by which the School Board may establish their own system of medical inspection of

Ald. LeRoy Shaw poured some hot shot at the system now in vogue and wanted to sever connections with the city authorities then and there. He wanted the Board to take the responsibility of raising the required money. The present system was unsatisfactory and there was little hope that conditions would, improve. Dr. S. Boucher, Director of Health, was not to be blamed for conditions, it was pointed out. It was the system and lack of financial support from the city that was to blame.

Summary action as suggested by Ald. Shaw was postponed for the time being, the Board, after pointing out that it would cost them \$50,000 to take over the work, decided to ask the City for the \$20,000 the Health Department now spends in the Protestant Schools and to secure from the Catholic School Commission their views in the matter.

The subject came up when the Rev Parents and guardians losis and General Health League well as the inspection generally. He the City and the Board looking towards closer co-ordination of effort and he outlined what he considered the illness is fast becoming an the necessary staff which would cost Quite a number of youth- \$50.950 per annum. France's Potential Resources

Refunding External Debt. Latest reports indicate that France is about to proceed with the funding of her debt to Great Britain and the United States. This step, in the opinion of international bankers, will urove a powerful impetus in the rise of the franc. The aftermath ut such refundment can best be gauged by the behaviour of the British Pound Steding, which has recently scored a new high since the war of \$4.80 per pound, or, within 6 cents of its par value. The Franc, during the early part of January stawed strength and the movement, we helieve, is but precursory, in view of the recent better tone of news, to a rise of greater proportions. As the current rate of exchange determines the future value of French Government 6% bonds present purchasers of these securities will have some splendid profits to show within the next few months.

Reparations. France is to receive large sums on her reparation account from Germany which will greatly enhance her treasury. The Ministry of Finance has issued a statement outlining the economic and financial situation. As it contains much information of interes to Canadian investors in French Government 6% Bonds we have summarised the statement as follows:

The Government will shortly be in a position to increase its re-The Government will shortly be in a position to increase its re-imbursements to the Bank of France which will do away with the meance of inflation, while it will also help to stabilize the value of the franc in relation with foreign exchanges. The franc as a result, will then start to gain in value and so cause the cost of living to decrease. The budgetary situation shows a steady improvement. In 1919 national expenditure exceeded revenue by nearly 24 billion francs; in 1923, the general budget, which included all expenditure of government departments balanced; in 1924, the general' budget will show an excess of revenue which will go a good way towards covering expenditures under the Special Budget for reconstruction of the devastated regions; in 1925, for the first time in eleven years, according to the present official estimates, all expenditires will be met by normal re-

The general economic situation shows a similar improvement. The terrupted development of France's foreign trade, the con increase in revenue from all sources of taxation, the reconstruction of the devastated regions and the new wealth brought to the country by the return of Alexce Lorraine are all factors of primei mportance to the nation's economic balance sheet.

In 1920 France's imports exceeded exports by 24 billion france today the situation is reversed and France is selling abroad more than she is buying. On the basis of the figures for the first six months of , the trade balance, for 1924, will be in France's favor to the

Seventy-five per cent. of the total damage done by the German armies in the devastated regions of Northern France has now been made good and this remarkable result has been achieved by France alone. The provinces of the north have recovered their entire pre-war tion of 4,278,000 inhabitants and the terrible ravages of war

Most important of all, in concluding this statement of France's econo mic and financial condition, the French Minister of Finance points out that Germany has now declared herself willing to make reparations payments will be credited to France. These monies will be of substantial help in enabling the French Government to speed up the execution of its financial program which includes provision for the

Area and Population. The total area of France, including Alsace Lorraine, amounts to 212,659 square miles. The population of France in 1911 was 39,601,509, and that of Alsace-Lorraine in 1910 was 1.874.014. In 1921, France within its new boundaries, had 39,209,766 people. The total population of the republic, according to the latest available figures is 184 per square mile. In 1921 there were 1,550,449 foreigners in Prance. Paris, the capital, has 2,906,472 inhabitants and Marseilles, Lyons, Bordeaux, and Lille are cities of over 200,000

National wealth and resources. The national wealth of France was estimated in March 1922 as being about Fcs. 770,000,000,000 as compared with Fcs. 300 000,000,000 in 1913 and 190,000,000,000 prior to the Franco-Prussian war. The national income is estimated at Fcs. 82,000,000,000 as compared with 37,000,000,000 in 1914, while the value of foreign investments (largely reduced since the war) is placed at from Fcs. 17,500,000,000 to 21,000,000,000 (gold). In 1914 placed at from Fcs. 17,500,000,000 to 21,000,000,000 (gold). In:1916 it was estimated at 42,000,000,000. French capital before the war had gone considerably into her colonies but in much larger amounts into older and larger foreign countries. The French investments in the United States, in Canada, South America, the Near East and the Far East were important factors, and the revenue from these foreign holdings probably aggregated about \$400,000,000 per annum. The total debt of the Russian Government to the French Government was given as of January 1, 1923 at Fcs. 6,040,000,000 (gold) inclusive of Fcs. 995,-000,000 (gold) charge by the Bank of France for discounting Russ Government obligations. Advances to other countries amounted January 1, 1923 to Fcs. 9,278,500,000, viz., Rumania, Fcs. 1,181,000,000 Jugo-Slavia Fcs. 1,755,000,000; Greece Fcs. 861,000,000; Poland Fcs. 1,056,000,000. Czecho-Slovakia, Fcs. 574,000,000; Belgium Fcs. 3,684,000,000; Italy Fcs. 49,000,000; exclusive of Fcs. 800,000,000 value of Italian supplies of materials, Esthonia; Fcs. 10,500,000; Fcs. 13.000.000. Lithuania Fcs. 6.000.000: Hi Fcs. 1,000,000; Austria Fcs. 500,000; and Latvia Fcs. 11,000,000.

Transportation. France has 25,766 miles of railway. The principal lines include the Northern Railway, the Eastern, the Paris-Lyons-Medigernanean, the Paris-Orleans, the Southern (Midd) and the State Railway. The aggregate surplus of all lines amounted to Fcs. 403, 300,000 for 1922 as compared with a deficit of Fcs. 2,084,000,000 in 1921, and 3,012,000,000 in 1920. During 1923 the railways did decidedly better than during the preceding year. Gross receipts for the period January 1-November 11, 1923 aggregated Fes. 6,166,804,900 as compared with Fes. 5,838,764,800 for the corresponding period in 1922. Navigable rivers total 4,512 miles and canals 3,031 miles. In 1914 here were 23,918 miles of national roads.

French shipping comprises 1,400 steamers and motor vessels of 2,963,229 aggregate gross tonnage; 358 sailing vessels of 281,965 aggregate gross tonnage; total 1,758 ships of 3,245,194 tonnage. The present shipbulking schedule calls for a construction of 1,255,000 additional tons.

Foreign Trade. France commands a great export market. Her exports are destined chiefly for Great Britain, Belgium-Luxemburg, the United States, Switzerland, Italy, Germany, Argentina. They consist largely of silken goods, cottons, clothing, chemicals, wine, lace, automobiles, and hewn timber. French imports are coal and coke cereals, raw cotton, cast iron and steel, wool and machinery, and come in great quantity from the United States, Great Britain, Belgium, Argentina, Italy and Germany. Exports aggregated 19,187,000 tons in the first ten months of the past year as compared with 18,212,000 tons in 1922 and 17,846,000 tons in 1913.

"The world must know that the franc will improve slowly but surely, like the wine of our country." -M. HERRIOT, French Premier

"France the worker, has before her a magnificent future which will demonstrate to the world that it was not wrong in displaying confidence in her." -M. CLEMENTEL, French Finance Minister

Exceptional Profits for Far-sighted Investors in FRENCH GOVERNMENT 6% BONDS

Present Price Yields Over 73/1%

And Yield increases

as Franc Rises

WE BELIEVE that an investment made today in French Government 6% Bonds (Loan authorized Dec. 16th, 1920 — Redeemable at par on or after January 1st, 1931), presents an exceptional opportunity for profit on any material advance in the value of French money (francs).

Due to the depreciation of French francs, a French Government 0% Bond can now be bought for approximately \$40.00; with French Exchange at normal (19.3c per franc) these same bonds would have a value of \$193.00 each.

International bankers believe that French francs will sell above 10c per franc before very long. Just think what it means to French Government securities; when the franc touches 10c, each bond of 1,000 francs would have a value of \$100.00—a rise of over 125% or a profit of \$60.00 for every \$40.00 invested. With the franc selling at 15c per franc or \$150.00 per 1,000 francs your profit will be \$110.00 for every bond of 1,000 francs or for every \$40.00 invested.

We made a thorough investigation to determine the best way to buy French francs for maximum profits. We believe that the French Government 6% Bonds, maturing after 1931, afford the best medium, for they represent to French Investors precisely what the high grade British Government Consols and our own Canadian Government Victory Bonds represent to us, being legal investments for every institution, Trust Fund and Savings Bank in France and constitute a strictly high-grade gilt-edged government investment. They may be sold again instantly, being listed on the Paris Stock Exchange (Bourse). The interest coupons have always been paid promptly on the dot and can be cashed in Montreal, New York, London and the principal financial centres of the world at the current rate for francs.

French Government Bonds will unquestionably come back to normal (\$193.00 per 1,000 francs). The United States were financially bankrupt after the Civil War. Their securities could be bought for a song, yet in a few years the Americans were on their feet financially again, and today are considered the richest

yet in a few years the Americans were on their feet financially again, and today are considered the richest nation in the world.

England, too, once faced what seemed to be financial disaster. With Napoleon virtually pounding at her gates, British Bonds went next to nothing, but the victory at Waterloo sent them skyrocketing. The Rothschild family accumulated the major portion of its wealth by investing in British Bonds and selling them when Wellington's victory became known.

The experience of France, bankrupt at the hands of Bismark, is within the memory of living man. Her bonds sold down to 7% of their normal value after the Franco-Prussian war. They appeared hopeless, yet in two years they had recovered 95% of their normal value, making fortunes for those who had the courage to invest in them. When millions of men and populations of nations lend their collective efforts to the task—nothing is impossible. The French Franc will undoubtedly come back to normal.

A study of history convinces one forcibly that the most difficult thing in the world to destroy is national existence. History will repeat itself. We believe that the opportunity of a lifetime, to make remarkable profits, exists today for our clients, through the purchase of these high-grade government securities. They rank as the highest-grade French Government bonds, and are virtually a first mortgage on the entire assets and resources of the Republic of France. The bonds are valid for thirty years after maturity and the interest coupons for five years after redemption date, thus enabling you to cash them at any time the exchange rates are favorable. change rates are favorable

change rates are favorable.

France ranks as a first-class military, naval and commercial power of the world.

French industries are thriving and working overtime. France is exporting goods to every country of the globe; her shipping is crowding the seas and the nation shows every evidence of industrial and economic progress. Reparation payments from Germany are further enhancing her treasury. These conditions should be quickly reflected in a rapid rise in the French franc, which would in turn increase the value of her Government bonds. That is why we urge you to buy French Government bonds now while they are on the bargain counter.

As the franc rises, the value of the abonds will increase as follows: Present Franc At Franc At Franc At

We are selling a good many of these bonds at the above price which covers every expense. Upon receipt of money-order or accepted cheque, we will at once confirm sale by return registered mail, but order must be received by return mail to insure these prices, as quotations are changing daily.

We handle all kinds of foreign government and municipal bonds and it is vitally important to us to have our clients select those which will make the most money for them and make it most quickly. Our interest does not cease after a sale, for it is our constant aim to keep in touch with our clients, to render them service, posting them when the bonds rise in market value, and advising them whether or not we deem it advisable to sell. This service is expensive to ourselves but its value to our clients is incalculable. Use the order form below.

THE INVESTMENT HOUSE OF CM.CORDASCO&COMPANY

Specialists Dealing Exclusively in Foreign Government: MARCIL TRUST BUILDING - 290 ST-JAMES STREET

NAME Mr., Mrs. or Miss ADDRESS

before the war."

After having exhaustively studied the sound financial condition of France, we believe that purchasing her high grade government bonds at present prices is an opportunity one cannot afford to miss, as the profits will be large and very rapid.

French Government 6% Bonds, which are described in these columns are purchased by French citizens, not only for the matety of the principal, but also because of their never failling, tax-exempt, interest income. In purchasing these bonds at the actual market price, the client makes his investment at rock-bottom prices.

It is our opinion that the present rate of exchange of the French franc is inconsistent with the financial and potential natural resources of the Republic of France.

We momentarily anticipate a sharp upward movement in the france.

of the Republic of France.

We momentarily anticipate a sharp upward movement in the In fact we believe that it will sell at 10c per franc, or \$100.00 p francs before very long. We are convinced our clients will do to treble their money within a remarkably short time.

Not only does the principal increase in value as the franc a but the interest income becomes automatically augmentes instance, each bond of 19,000 francs yields an income of 600 france.

instance each bond of 19,000 francs yields an income of 600 francs per annum.

At the present rate of the franc holders of French Government 6% bonds receive interest at the rate of over 7%%. As the franc rises the interest or return on the principal, automatically increases.

With the franc auoted only at 8 cents, the holder of these bonds would receive \$48.00 in Canadian money for each 600 francs yearly interest income. This is a good return on an original outlay of \$400.00 representing as it does, an interest rate of about 12 per cent instead of 6%. With the franc at 10 cents, or \$100.00 per 1,000 francs, the interest income converted into Canadian currency would amount to \$400.00 francs will be worth \$90.00 in Canadian money; this return represents an interest rate of over 22% on an investment of \$400.00. When the franc reaches par, the annual interest in Canadian currency will be \$115.00 for every 600 francs, this return is equivalent to an interest rate of over 28 per cent on \$400.00.

As remarked elsewhere, you do not have to cash your interest coupons as soon as they become due. You can hold each interest coupon for five years after redemption date. This will permit you to dispose of them at materially higher rates than at the present time.

The important fact to remember, however, is that your principal increases in value as the franc rises.

Rarely has the investing public been offered an Investment that returns such an attractive yield with absolute guaranty of both principal and interest.

Thousands of our clients in Canada and the United States have surches and these sound, high-grade, French Government Bonds. They

principal and interest.

Thousands of our clients in Canada and the United States have purchased these sound, high-grade, French Government Bonds. They have placed their money where it will return them a handsome income together with a unique opportunity of reaping a liberal profit.

Many investors, heretofore compelled to be satisfied with 3 and 4% interest on their principal have liquidated their former holdings and purchased French Government 6% Bonds.

They are, as a result, in great demand and it is not st all unlikely that the decreased floating supply alone will cause them to rise in value. We believe present purchasers will receive handsome profits during 1925. French Government 6% Bonds will rapidly increase in value.
