The twenty-ninth annual meeting of the snareholders and policyholders of the London Life Insurance Company was held at the company's offices, Lon-

Insurance Company.

don, Canada, Feb. 8, 1904. The president, Mr. John McClary, occupied the chair, and there were present a number of shareholders and policyholders of the company.

The notice calling the meeting was read by the manager and secretary, Mr. J. G. Richter, after which the following report and financial statement were submitted:

TWENTY-NINTH ANNUAL REPORT. The directors of the company beg to submit annual report and duly audited financial statement for year ending Dec. 31, 1903. During the year 14,102 applications for insurance, amounting to \$1,874,-729, were accepted and policies issued therefor.

The net premium and interest receipts of the year were respectively \$323,568 95 and \$74,442 33, totaling \$398,011 28, an increase of \$42,908 17 over The sum of \$80,764 29 was paid for death claims, \$4,990 for matured en-

dowments, and \$9,483 96 for surrendered policies and cash profits, a total of \$95,238 25 paid policyholders or their heirs during the year. The insurance in force on the company's books at the close of the year, after deducting all re-insurances, amounted to \$7,466,627 67, under 3,751 "Ordinary" and 49,951 "Industrial" or a total of 53,702 policies—an increase

of 4,644 policies for insurance of \$638,793 30 for the year. The assets of the company, exclusive of uncalled but subscribed capital amount to \$1,462,965 88, an increase of \$160,902 02 for the year. The interest and other payments falling due during the year were in the main satisfactorily met. No losses in respect of investments were incurred during the

The liabilities of the company under existing policies, and in all other respects, have been provided for in the most ample manner, the whole amounting to \$1,338,793 55. The surplus on policyholders' account, exclusive " uncalled but subscribed capital, is \$124,172 33, and after deducting paid up capital, accumulating profits and contingent fund, there remains a net surplus over all liabilities and capital, of \$44,535 33.

JOHN G. RICHTER. Manager and Secretary.

Surplus on policyholders' account apportioned as under: Contingent fund and special reserve ... Accumulating profits on with-profit policies 18,637 00 Surplus over all liabilities and capital

To the Shareholders of the London Life Insurance Company: As auditor I have checked and examined the company's books for the year ending 31st December, 1903, and find them carefully and correctly kept. The annexed cash statement and balance sheet are true abstracts from the books, and properly exhibit the company's affairs. I find the securities

London, 3rd February, 1904. JAMES McMILLAN, Auditor. The actuary of the company, Mr. Edward E. Reid, B.A., A.I.A., submitted his report on the valuation of the company's outstanding policies and other obligations, as follows:

The valuation of the reserves on the policies in force has been made on the same high standard as in previous years. The interest basis is 4 per cent on business issued previous to January 1st, 1900, and for policies issued since that date 31/2 per cent for "Ordinary" business and 3 per cent for 'Industrial" business. The Government requirements in this respect have therefore been considerably exceeded.

Provision has been made for surrender values on policies now lapsed, but for which no surrender value has as yet been applied for; and the practo win. He finished 5 points over Scott, tice, hitherto followed, of providing in the liabilities for accruing as well as accrued profits has been continued.

The claims of the year have been somewhat higher than in any previous years. In the ordinary branch the average amount of the claims exceeded very considerably the average amount of the policies in force. Had the claims not averaged more than the policies in force the total amount would have been reduced by nearly \$3,500. The industrial claims continue to show a very favorable percentage (20.9 per cent) of the premium income, although the total amount is in excess of any previous year. The adoption of the report was moved by the president, Mr. John Mc-

Clary, who said: Gentlemen,—The report of the directors and accompanying financial statement are, as usual, sufficiently clear, and present the affairs of the company in such detail as not to require any extended remarks for their

The results of the past year are, on the whole, quite satisfactory, steady and solid progress having been made in all essential respects.

The interest and premium receipts of the year exceeded the like receipts of the previous year by over 12 per cent. The assets also increased by over 12 per cent, and the surplus over all liabilities, ascertained on the company's

exceptionally stringent basis, increased over 11 per cent. The funds of the company are being invested mainly in first mortgages on good class real estate, the new mortgage loans of the year aggregated over \$323,000, and over 80 per cent of the whole funds of the company are thus invested. Over 95 per cent of the total assets are invested in interest-bearing securities of undoubted character, leaving less than 5 per cent of non interest-bearing assets, consisting of outstanding and deferred premiums and

interest accrued on current investments. The company's exceptionally strong financial position, as evidenced by the foregoing, will, no doubt, be equally as gratifying to the shareholders and policyholders of the company, as it is to the directors.

With these remarks I beg to move the adoption of the report. The vice-president, Mr. A. O. Jeffery, K.C., LL.D., D.C.L., in seconding the adoption of the report, said:

The company, transacting "Industrial" as well as "Ordinary" insurance, the ratio of expense to income will naturally be somewhat greater than would be the case if "Ordinary" insurance only were transacted. As, however, the income from the respective branches is such as to cover the respective expenditures, each branch takes care of the outlays pertaining thereto without detriment to the other. For example, the gross expenditures The total amount to be offered in of the past year in proportion to net income after deducting dividend paid purses at the Stratford races this year shareholders from interest earned, was 34.7 per cent; the apportionment of this ratio to the respective branches is, 25.6 per cent to the "Ordinary," and 39.4 per cent to the "Industrial," which, taking into account the volume of business transacted in proportion to total insurance in force, and the more than has been put up for several nature of same, is, I am confident, as favorable a showing as is made by

The president has already called attention to the character of the company's investments. I would add that not only are they exceptionally good crowds in anticipation of seeing norses of high standard. Six stake races are announced, the entries for which will announced, the entries for which will then it would to invest the same funds in debentures or other such securities. ties, but the extra income realized from mortgage investments much more than makes up for the difference in the first cost in this connection.

The average rate of interest earned by the company the past year on its mean invested assets was 5 2-3 per cent, which must be admitted to be a very good showing. I have much pleasure in seconding the adoption of the report.

The adoption of the report was carried unanimously. A hearty vote of thanks was tendered the agents and other employes

sold Harold H., 2:04, to Mr. Mackensie, of Winnipeg, a year or two ago, owns half a dozen swift prospects for the races. A pacer called Chimes Echo, is booked for a 2:10 performer before the close of 1904, and some say faster.

The closed in "Holory" faster.

The Caracteria was tendered the agents and other employes of the company for the satisfactory manner in which they discharged their several duties during the past year.

The election of directors resulted in the following gentlemen being elected for the current year, viz. Messrs. John McClary, president; A. O. Jeffery, vice-president; William Bowman, George C. Gibbons, W. F. Bullen, A. S. The Canadian "talent" have picked Emery, Judge A. Bell, T. H. Smallman and Thomas W. Baker.
