india was based. He says that districts with a population of three millions will be sufferers from famine until the end of March and that it may continue in some parts until the end of June. In other districts having forty-four millions of a population the distress may deepen with the famine for a shorter or longer period, while six million people in the native states may be victims of famine. The density of the famished population varies from 902 per square mile in Mafferper and Bengal to 122 per mile in Balagast and the central provinces. There were 1,200,000 people on the relief work at the beginning of January, and this number will certainty reach two and may exceed three millions. It is estimated that the famine will cost the India treasury at least 24,000,000. To-day's cablegram from Calcutta states that the famine will cost the India treasury at least 24,000,000. To-day's cablegram from Calcutta states that the distress is rapidly deepening, especially in the Bundel Pund districts, where half the popula-

tion needs relief. The Mansion House relief fund amounted to nearly £30,000 to-night, including a donation of £200 by the Prince of Wales, and the donation by the Queen of £500, which has already been chronicled.
