AND GLADSTONE HOLDS THE PAR-NELLITES RESPONSIBLE.

The Deplorable Division in the Ranks of the Friends of Ireland is the Principal Obstacle to the Progress of Their Cause, Says the ex-Premier in a Recent Letter.

DME, May 19.—The Voce Della Verita is fast accumulating gold. In pursuance of the policy of getting the country's finances on a gold basis Parliament has passed a resolution providing for the withdrawal from circulation of \$67,000,000 worth of silver notes and the depositing in the Austro-Hungarian Bank of \$53,000,000 in gold, to be bought by the state.

The Irish, he says, are undoubtedly showing a great example of obedience to the law, but they are divided among themselves.

The brigade soon had the first under control, but not before the building and contents were damaged to the extent of \$500.

Three Rivers, Que., May 19.—J. R. Hooper is counting the days that still have to be passed before his trial takes place. Very little is heard of his trial in the city and apart from the interest taken in it by those directly interested not a word is heard of it. It will take place on June 1. Hooper is looking much better and is gaining in flesh. He occupies himself with his hobby, postage stamps, and takes exercise regularly in the yard. He expresses the opinion that no jury will convict him of a crime of which he is not guilty and for which there are no direct proofs. of those who trust to the haphazard fashio of buying a Toronto Sunday World in th

The Underwriters' Reply.

Editor World: In common with other citizens, I read with some degree of interest the new insurance scheme published in the city press as recommended by Alderman Lamb for adoption by the City Council. Not knowing the various sources from which he obtained his information, I am not in a position to check the correctness of his figures. If he is not more correct in his other figure ethan he is in regard to the average rate of insurance paid in Toronto as compared with other cities, very little dependence can be placed on the worthy alderman's other fanciful calculations. When he wrote his report he had in his possession the average rates paid in Montreal and in 15 American cities, showing that the average rates paid in Montreal and in 15 American cities, there was therefore no excuse for his misrepresentation. He named the only six cities in the Statesin which the rates on the buildings of first-class warehouses are less than in Toronto and that in the four remaining cities the rates were much higher. He further ignores the still more important fact that the rates on stocks of all kinds (the insurance on which amounts to at least four times that on buildings) are lower in Toronto than in any of the other cities named. Probably this information, if given to the public, would be too damaging to his case.

As there is a good deal of misapprehension, fi not misrepresentation, regarding insurance rates here and elsewhere, would you kindly publish the accompanying tabulated themen's regarding rates, which speaks for self.

It is worthy of remark that the President decounts of Trade represent-

P.S. It would be important to learn what effect Aldermaa Lamb's scheme (if carried into effect), would have on the credit of the city, and at what figure the next issue of Toronto bonds could be placed on the market.

Wontrea Killed at a Barn Raising. Belgrave, Ont., May 19.—A fatal accident took place at John Cole's barn raising. While putting up the purline plate a chain, which was being used to raise it, broke and let the plate fall, striking John Taylor on the head, laying bare the fore part of the skull and knocking him to the floor, a distance of about 18 feet, bruising him in a terrible manner. The United States Treasury's gold holdings at the present time are actually little above \$83,000,000. Considering the unexpected volume in which idle foreign capital is flowing from that country the possibility of a new bond issue to replenish the gold reserve, says The New York Post, becomes more reasonable. When the issue of last February was first announced the gold balance was \$72,000,000, and it never sank below \$65,000,000. But all this may as yet be called su entire uncertainty. If, as has been rumored, such a loan were to be offered in Europe it could presumably be floated, though the price which the issue could command is a matter of some conjecture.

Sugar Trust stock sold down to 94 on Saturday, which is 15½ per cent, lower than the recent high record. Serious brokers, who a fortnight since were predicting 125 for the stock and pooh-poohing all suggestions of opposition in the House, are to-day apparently convinced that nothing but ruin for the industry is in store. The one conviction is as childish as the other. Sugar stock may or may not have been marked down to its normal level of value. That depends largely on the general market's course. But whether it has or not it is quite certain that the present decline will be overdone like the advance which came before it.

The latest statement shows a further expansion of Canada's export trade. For the past 10 months of the fiscal year our exports were \$94,299,155 in value, an increase of \$1,661,553 when compared with the corresponding 10 months of last year. This is a most satisfactory return, reflecting the increasing financial position of the country. Discovery. See the evidence of it. It's sold in every case, on trial. Henry A. King & Co.'s special wirel, from
Hubbar-l, Price & Co., New York:
New Yorks. May 19.—The pool in Sugar continued to liquidate its holdings. The stock had further break of over 3 points. All kinds of rumors were current. The Havemeyers, Sear is and the rest of the lower Wall-street people are to be called up before the Senate Investigating Committee. They will be made to tell all theyknow. Does anyone suppose that a Senate Investigation Committee will get anything of importance out of these shrewd millionaires? Those who will sell Sugar now will help create a short interest, it has had a fall of 15 'points from the highest prices, and 15 points in as many days means a great deal in Wall-street. There was very little doing in any other direction. The action of the grangers was not strong. The prospective reorganization of the Atchison should be a buil feature and help that stock. Gas acts mighty strong in a bear market; no better bull point could be given.
