

St. Lawrence Engine Works,

(ESTABLISHED 1840.)

W. P. BARTLEY & CO.,

PROPRIETORS,

**17 TO 29 MILL STREET,
MONTREAL,**

Builders of Marine Engines, from 25 to 1500 Horse power, both "Paddle" and "Screw," Engines and their Boilers.

Builders of Horizontal High Pressure Steam Engines, from 3 to 700 Horse power, as follows:

3 Horse, 8, 10, 15, 18, 24, 34, 40, 46, 61, 86, 92, 107, 114, 138, 164, 181, 210, 235.

Each of the above Engines develop "THREE" times the rated power, that is to say: The Engine rated at three would work to nine Horse power, and the largest size, viz., 235, will develop 705 actual Horse power.

BOILERS.

For the Engines as above for each we furnish a first-class Boiler, a Boiler in accordance with size. The Boilers are either Cylindrical with return tubes, or of Locomotive; or return tubular.

Our Boiler work is nearly all performed by Machinery, viz.: Punching, Bending, Riveting and Boring. As our Works were burned down last year, all our Patterns are of the most modern approved style. The public will see the great advantage they will have by inspecting our works. Machinery and arrangements to execute orders promptly, and in a style that cannot be approached by manual labor; or old and inferior Machinery. As all our Machinery is new, and the best that can be found in the works of British and American Machine Builders.

Parties requiring Machinery can have their work in the most improved Style. All our Patterns are New, and we will have no difficulty in inducing them to take old designs.

After an experience of over a quarter of a century in business, we flatter ourselves we will give satisfaction to those who favor us with their orders.

W. P. BARTLEY & CO.
