

Mr. A. Carmichael and Jacob Hose have purchased the Rat Portage Electric Light, Telephone and Power Company's interests, and took possession of the property on the 1st of October.

The Toronto and Scarborough Electric Light and Power Co. has been established, and arrangements are being made to begin immediately the construction of an electric railway from the Woodbine to Little York, in East Toronto. This line is to be completed and put in operation before the end of the present year. The directors of the company are as follows: D. G. Stephenson, Reeve of East Toronto, Ald. Hallam, J. F. McLaughlin, W. T. Murray, J. J. Foy, Q.C., Robert Davies, J. P. Murray, John Stark, H. M. Pellatt and A. W. Dingman. The officers are: President, D. G. Stephenson; vice-president, Ald. Hallam.

The "Unique"

TELEPHONES

Made especially for Exchange and Private use.

The cheapest, simplest and most effective Electric Telephones in the world.

The "Unique" Transmitter is the only one made which does not require adjustment and that is not affected by atmospheric changes, or rust up.

ALWAYS THE SAME.

Will transmit over the longest distance without readjustment.

"Samson" Batteries supplied with the "Unique."

THE "CLARK" WIRE.

Insulation Guaranteed wherever used, Aerial, Underground or Submarine.

In a letter from the Inspector of the Boston Fire Underwriters' Union, he states: "A thoroughly reliable and desirable Wire in every respect."

The rubber used in insulating our wires and cables is especially chemically prepared, and is guaranteed to be water-proof, and will not deteriorate, oxidize or crack, and will remain flexible in extreme cold weather and is not affected by heat. The insulation is protected from mechanical injury by one or more braids, and the whole slicked with Clark's Patent Compound, and special extra finish, which we have now adopted for all our solid wires as an extra weather-proof protection, and also preventing chafing and abrasion which is water, acid, and to a very great extent fireproof. Our insulation will prove durable when all others fail. We are prepared to furnish Single Wires of all gauges and diameter of insulation for Telegraph and Electric Lights from stock. Cables made to order. We are now prepared to furnish our Clark Wire with a white finish for ceiling, clean work as well as our standard color.

Clark Joint Gum should be used for making waterproof joints. This is put up in half pound boxes, in strips about one foot long and five-eighths inch wide, and when wrapped about a joint and pressed firmly it makes a solid mass. For railway and Motor use, we make all sizes of stranded and flexible with Clark insulation. We guarantee our insulation wherever used, Aerial, Underground, or Submarine, and our net prices are as low, if not lower, than any other first-class Insulated Wire. We shall be pleased to mail Catalogues with terms and discounts for quantities.

A Great Loss

If you have any pipes or boilers uncovered, you are losing on same at the rate of 80 cents every year on each square foot of surface exposed. By having them covered with our

Mineral Wool Sectional Covering

you will save 85% of this loss. The saving thus effected in fuel will in one year more than pay the cost of covering, which we guarantee to last as long as the pipes. Our covering is the best fuel saver on the market.
