

At Mooselands Mr. Stenshorn continues prospecting for the Mooselands Mining Company, and that generally the outlook in the Eastern Districts is good.

MONTAGUE.—A very rich strike of gold has been made at the Annand Mine.

GOLD RIVER.—This district was looking up at the close of last season, and there is a rumor that something very good has been discovered there this spring. It may be that it is only the continuation of the work on the rich lead struck last fall.

KILLAG.—This mine is now managed by Mr. Anthony, who is doing considerable prospecting with a diamond drill.

GAY'S RIVER.—Mr. R. R. McLeod and Mr. John Harlow, supt. of the Coldstream Mining Company, are about resuming work at the Company's property at Coldstream, near Gay's River. There is now a fifty stamp mill on the property, the largest in the Province, and a very extensive surface plant. The initial tests of the conglomerate rocks were far from encouraging, but old mill men say that the plates were too new and the flow of water too great to save the gold.

We trust that the present operations will result more satisfactorily.

The Eastern Development Company (Coxheath mining) has elected these officers: Isaac P. Gragg, president; Albert A. Pope, vice-president; M. F. Dickinson, jr., auditor; W. E. Barrett and Marcus Beebe and Thomas Mair, secretary and treasurer. The annual report shows cash on hand \$31,946; bonded indebtedness, \$349,000. It has been decided to issue \$1,000,000 20-year 7 per cent. gold bonds, in order to fully provide for all contingencies. Of the bonds \$250,000 will be exchanged for the outstanding issue, \$350,000 will be used to provide for plant, and the remaining \$400,000 reserved for future uses.

GOLDENVILLE.—Two companies are prospecting here. One at Mitchell's Lake and the other south of the mines. The "Sutherland" and "Rockville" are shut down. There is very little doing in the mines. A few men are working on the "Sherbrooke & New York" areas.

MALAGA.—Three mills are running night and day. The Malaga Gold Mining Company have a good force at work, and are taking out nice looking quartz from the Rabbit and Red Leads. The mine is in "good shape," and pleasing results may be looked for.

The Boston Gold Mining Co., as usual, is getting nice quartz, and the mine is showing well. Recently another lead was opened, which is supposed to be an extension of the celebrated Rabbit lead, now showing so well on the Malaga Co's property.

The Parker & Douglas Mine is working two shifts, and the quartz is showing as well as usual. The air drills are taking down large quantities of ore, which, as depth is obtained, seems to improve in quality.

There is a report that the Minneapolis mill will be started up soon.

WHITEBURN.—The water has been pumped out of the Colo Lead on the Whiteburn Mining Co's property, and the work of milling will at once begin. Should results prove satisfactory the probability is that the condition of affairs will change very much for the better, so far as this mine is concerned. The mill is now being overhauled and will start up in a short time.

The Queens Co. mine is driving West on the North lead towards the old workings of Mr. McLeod. The new shaft east of the mill, on the same lead, is now in working order, and mining operations are actively being pushed on that end of the lead. "Good gold" is now showing in the quartz.—*Gold Hunter.*

Edward Bellamy in looking backward omitted to say that the peace and prosperity which in the year 2000 attended the nations were due to the perfect health of the people who had awakened to the fact that the Elixir of Life was found at last in K. D. C.
