

VOL. XXIX. LONDON, NOVEMBER, 1897. No. 11.

NOTES ON THE LIFE HISTORY OF COLIAS INTERIOR, SCUD. BY H. H. LYMAN, MONTREAL.

When in New York, towards the end of May, 1894, I paid a visit to Mr. B. Neumægen, who, though suffering considerably from the fatal disease to which, after a brave fight, he finally succumbed, received me kindly, and after a short conversation sent me upstairs to Mr. Doll to get the names of certain species which I had brought for determination.

In one of the drawers which Mr. Doll showed me I found several specimens of Colias Interior, one being of a very rich shade of colouring, almost orange, in fact. Asking where they came from, I learned that they had been taken the previous season at Camp Lou, on Osgood Pond, in the Adirondacks, and I immediately determined, if possible, to get eggs. Early in July I wrote to Mr. Neumogen to ascertain the best time to be on the happy hunting-grounds and for any suggestions, and received a post card, dated oth July, written on a railway train, and the last communication I received from him, telling me that then was the right time. I was unable to go just then, but on the 20th I left by the evening train over the Adirondack and St. Lawrence Railway, and reached Paul Smith's hotel shortly after 9 o'clock. The 21st it rained all day till late in the afternoon, but the 22nd was fine, and I soon had 2 9 9 of Interior caged for eggs. For the cage I used a tomato can filled with such soil, chiefly sand, as I could find, and in it I placed two species of Vaccinium. two willows, Kalmia Augustifolia, Trifolium Stoleniferum. The following day I took five more females and two males. One & Philodice was taken courting a \mathcal{P} Interior, and was confined with the $\mathcal{P} \mathcal{P}$ to see if it would copulate with one of them, but it did not do so, so far as I observed. Three of the freshest 9 9 were killed for the cabinet, but the remaining four with 1 & Interior and the & Philodice were kept caged. The 24th was again rainy, and in the afternoon I left for home, carrying my menagerie with me. On the 26th July the plants were changed to a flowerpot of larger size than the tomato can, and the following species of plants were added : Melilotus Officinalis and Alba, Amphicarpæa Monoica,
