The KEYSTONE

[Percussion Core Drill Attachment
is an economical appliance for
TESTING COAL LANDS.

It can be used in connection with any good "churn" drill, but
operates best on the long-stroke KEYSTONE, thus making the
cheapest and quickest method of boring to be found.

In operation a hole is sunk to the coal with the ordinary Rock
Bit. The Bit and Stem are then removed and the "oring Attach-
ment put on in their place. It takes a 4 ft. core out of the Soft-
est as well as the Hardest part of the vein. Avoids all delay and
expense of "rods" water wash, diamonds, shot, and heavy operat-
ing mechanism.

Price of Complete Attachment
\$200.00

Catalog No. 2 B. is a book on the subject.
We make Water, Oil & Test Well Drillers
for all depths and purposes.

Keystone Driller Co. Beaver Falls, Pa.

ONE MAN'S VIEW.

A well-known min-
ing man recently fin-
ished an Inspection of
the ANTHRACITE coal
fields of Pennsylvania. When asked
what impressed him most, he
said :—

"The acidity of the water, and the fact that
of all the pumps I saw there two out of three
were Jeannesville Pumps."

An indication at least that we know how
to handle the acid water problem.

When you send us the lift and quantity of
water and the available power, we will send
you complete information about what we can
do for you.

Our bulletin No. 8, fresh from the printer,
is full of up-to-date information. Write for
it now before you forget.
