

Reinforced Concrete

Means maximum speed in erection, and makes use of materials locally available.

Does not require skilled mechanics, now so difficult to secure. Reinforced Concrete construction furthermore conserves materials vitally needed in the prosecution of the war.

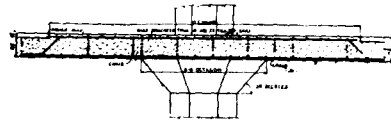

CORR-PLATE FLOORS

show saving in head-room, placing of reinforcement and concrete, and differs from other flat-slab floors in having a proper distribution of the reinforcement, thereby securing a uniform factor of safety.

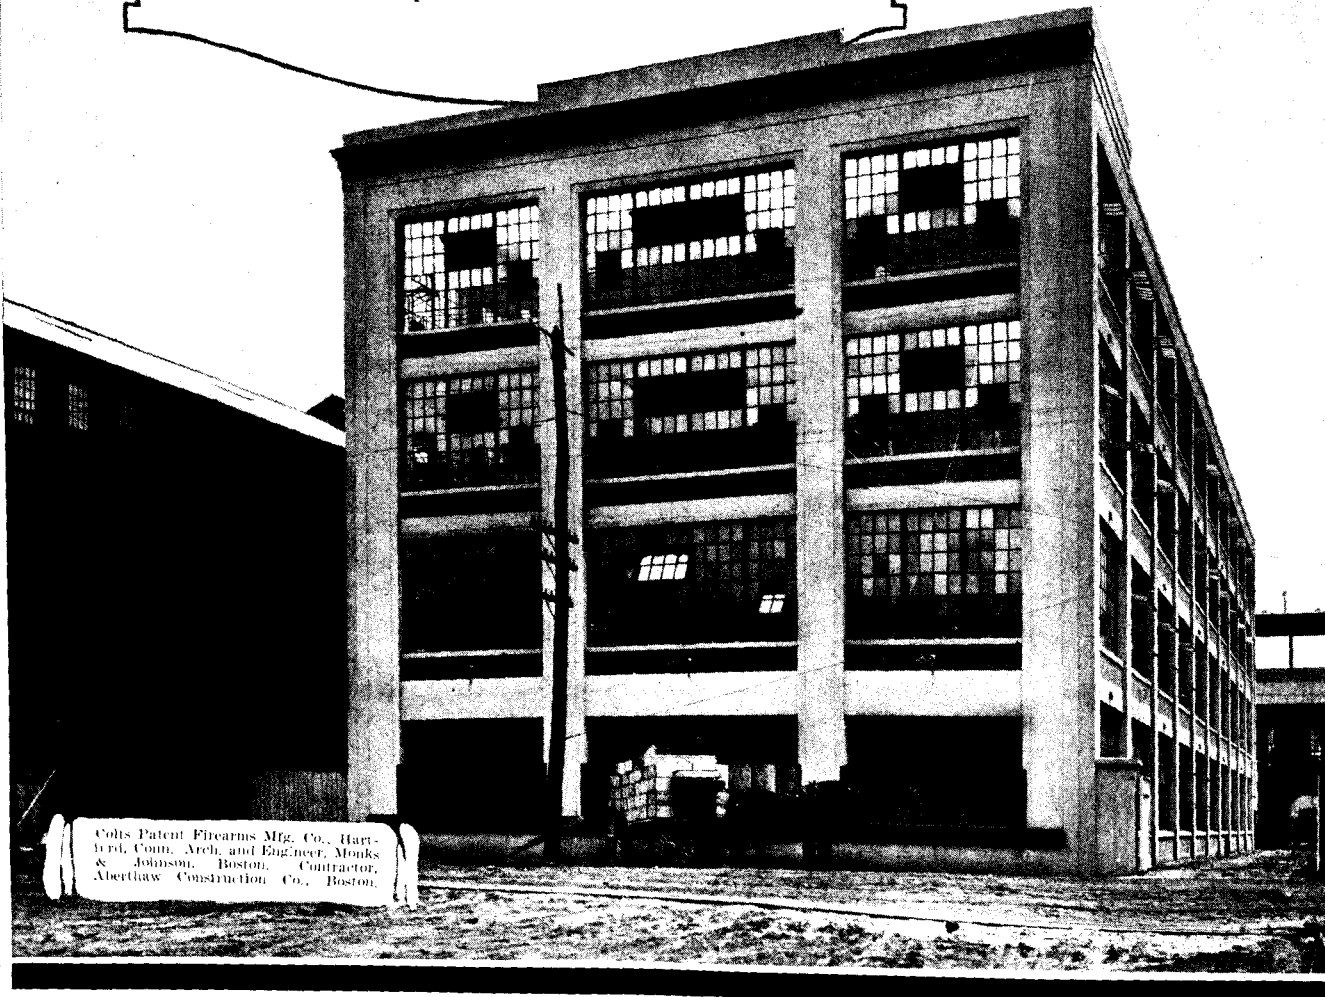

Request on business letter head
will bring particulars.
