MR. CAMPBELL'S POSITION

Doubt as to His Connection With I. C. R. Commission.

MONTREAL, Jan. 27.—(Special.)

So far the railway community has not been able to ascertain if A. W. Campbell, the newly appointed deputy minister of railways and canals, will also be chairman of the I. C. R. commission as was M. J. Butler, who left the board to become general manager of the Dominion Steel Company.

The Intercolonial Commission will hold their regular monthly meeting here to-morrow and Mr. Butler will sit on the board. The estimates are to be the house. The chairman, together with D. Pottinger, F. P. Brady and E. Tiffin, are all here, and they do not appear to have any knowledge regarding their new colleague's jurisdiction.

All speak in the highest terms of the new deputy.

Taylor, M.P., A. L. Fraser, M.P., Glen Campbell, M.P., and F. R. Lawlor, M.P. The chair will be occupied by Geo. B. Reid.

Russian Slugged.

Sedar Badchura, a Russian, 20 years of age, yesterday morning and was slugged by an Italian who lived him to High Park last Wednesday night.

Badchura arrived in the city last night from Sudbury. The Italian accosted him in the waiting room at the Union Station and offered to find him a boarding house. At the lake shore gate of High Park the man whom he had libelously regarded as his benefactor slugged him on the back of the head with some blunt instrument. He was stunned and, after going thru his valise, his assailant fled. He got nothing of value.

MISS ZOELLNER'S RECITAL

Pupil of W. O. Forsyth, a Virtuoso and Composer of Distinction.

Miss Zoellner's recital last night at the Margaret Eaton School proved conclusively that she is not only a virtuoso but also a composer of distinction. She is a pupil of W. O. Forsyth, and her work at the piano fully justified Mr. Forsyth's opinion of Miss Zoellner's art in pianism.

She gave selections from Chopin, Liszt, Faure, Sauer, and Beethoven, and her own original compositions. Her playing was not only technically perfect, but it was full of life and spirit. Her own original compositions were of a high order of originality. Miss Zoellner and Mr. Forsyth should congratulate themselves on the success of her professional debut.

New Bread Bill.

Notice was given by W. F. Nickle (Kingston) of a bill to repeal the McNaught bread bill, passed at last session. Nickle will ask that the right to determine the weight of the loaf be given to the municipalities, and that to them also be left the duty of determining the quality of the flour used in the question of the use of deleterious substances and the supply of light-weight bread. It is hoped by this means to increase the weight of the standard loaf.

Hon. Col. Matheson will on Tuesday next move the following resolution: That this house receives with much satisfaction the intelligence of the munificent donations which have been made in aid of the reconstruction of the legislative library by the governments of Canada, the several Canadian provinces and the United States, and by the ladies and gentlemen whose names appear in the report which has been laid before the house; and this house hereby extends its grateful thanks to the donors.

That this house acknowledges with gratitude the prompt and generous action of the governors of the University of Toronto in placing the house No. 4 Queen's Park at the service of the government for the temporary use of the library.

Hon. J. J. Foy will introduce a bill to allow the plaintiff in an action to receive his damages, without security being given, even if an appeal is taken to the privy council. In this way the intention is to give a measure of relief to litigants of small means.

ding and clothing, which have been contaminated by the flood water, burned.

All omnibuses, street cars and other heavy traffic on the bridges were stopped tonight. In many places a coating of ice has formed on the flood water in the streets.

Prosecution of Famine-Breeders.

Premier Briand has declared that persons who hoard provisions in the affected places, with the intention of re-selling them at a big profit, will be drastically dealt with.

The stage of the waters this morning extended all records back to 1815 and up to 12 o'clock the river continued to rise at the rate of three-quarters of an inch an hour.

The valley of the Seine now presents a terrifying spectacle. The flood is miles wide for 25 miles above and the raging torrent runs thru the narrow cut of the city at the rate of 35 miles an hour. It is dash with the parapets of the bridges, where it is not actually overflowing them, turning the streets into muddy lagoons and choking the underground workings of the city to the bursting point.

There are 700 miles of sewers and two rivers, the Bievre and the Grence Hotel Bellevue under Paris. The latter is running under the opera house, the pressure of thousands of cubic yards of water.

J. P. Morgan has cabled from New York tendering \$100,000 if outside contributions to the relief fund would be acceptable.

Pope Sends Aid.

ROME. The Pope to-day sent a large sum of money to the Archbishop of Paris for the relief of flood sufferers in France.

Regard it as Punishment.

NAPLES, Jan. 27.—The damage from the storm increases. Many roads along the sea front are under water and the wreckage thrown up by the tide proves that many small boats have been lost.

The superstitious attribute their affliction to the recent appearance of new comets. They regard it as a divine punishment and to-day the churches were filled with persons who were praying fervently for the passing of the evil.

had been given the hint, and no self-respecting man could do otherwise.

T. W. Crother (Wentworth) reviewed the history of the case and read from the printed correspondence to show that engineers who are still in the employ of the government had been guilty of perjury in their testimony to the jury.

"They will stay with us to the end," he declared.

If the government refused to investigate the matter fully, it would be saying to the people of the country that they had no rights and that robbery was condoned.

After Midnight.

Shortly before one o'clock this morning, R. L. Borden rose to address the house. He said the motion of the premier might properly be styled a motion for the prevention of an investigation. The case as originally presented by Mr. Lennox had not been answered. Estimates had been made by men who, when results were actually seen, were so absolutely absurd and misleading as to justify the dismissal of each one of them.

Charges of the gravest character had been made against some of
