Yesterday afternoon he daily hands, in spotless dress, and locks confined under a neat white cap, gave a demonstration of how to produce golden pound prints from a tin of ivory-colored rich cream. It was interesting to note that preparation is a factor that adds as much to the success of the product as does the actual operation. Hot water and then cold were plentitually used in rirsing the wooden churn. dipper, spoon and other articles were all carefully cleansed, and the floor about the churn swept before it was locked and made taut in preparation for its swing. Time cour or against the condestants, and it was not to be wondered at that the barrels swing round as if impelled by the skill of Japanese jugglers. Personal Banking Service

The collection of cheques and drafts is one of the most important parts of the Sterling Bank's Service to its clients.

Personal attention to each individual client has resulted in a speedier Collection Service with notably better results.

A stereotyped reason for refusing payment will not be accepted by us. If after every effort to collect, a note or draft still remains unpaid, a full and adequate reason for nonacceptance must be obtained before it is returned. This saves time and the cost of double drawing.

The same efficiency will be found in other Departments of the Bank. Personal effort on the part of every officer has resulted to our clients in relief from work and worry, in better credit arrangements and the offering of matured advice and personal assistance.

If this is the kind of Banking Service you need, we will be glad to see you-in your office or ours.

Rates for Telephone Service

IN the new schedules of rates filed with the Board of Railway Commissioners we have so grouped cities and towns of approximately equal telephone development as to wipe out existing inequalities.

Business service, as in cities of Toronto's population elsewhere, is placed on the message rate basis. This basis will provide for payment by business subscribers in direct proportion to their use of the service for outgoing messages. Small users, and those whose telephone traffic is largely incoming, will get the benefit of their restricted use, paying only for the calls they originate. Residence service continues on the flat rate basis.

A flat rate for business service high enough to provide an adequate return for the service rendered would bear with increased unfairness on the small user. Here, as in other cities of high telephone development, the message rate schedule is the only fair basis for business service.

The rates proposed for Toronto under the new schedule are shown in the following table:-

Proposed Monthly Rate BUSINESS SERVICE Individual Line \$5.00 for 100 outgoing messages. Each additional message 4 cents. RESIDENCE SERVICE \$4.00 Individual Line

2-Party Line.....

These new rates, we submit, should be considered in the light of the present purchasing power of the dollar.
